Dear Gunn Student,

Our vision is to support all Gunn students as they prepare themselves to thrive as global citizens in a rapidly changing world. We develop our students’ knowledge, critical thinking, and problem-solving skills, and nurture their curiosity, creativity, and resilience, empowering every child to reach his or her fullest intellectual, social, and creative potential. Toward that end, our school offers a rich and expansive academic program that requires you to plan and make decisions based on personal strengths, goals and interests.

The Course Catalog is compiled to help you and your parents with the decision-making process. Here are a few points that we encourage you to consider during the course selection process:

- Be open. Don’t shy away from taking a class that is outside of your typical academic interest or that you think you should – you might discover something you love.
- Talk to people (your counselor, teachers, parents, and others who know you well), ask lots of questions and remember that what you want to study is ultimately your choice.
- Take time to reflect on who you are and who you are trying to become; select classes that will help you develop new ways of thinking and understanding.

Before making choices read through this book and familiarize yourself with all of the opportunities available. Make yourself aware of the requirements of the various courses in order to determine how much time and effort you will need to satisfy these expectations. Again, most importantly, don’t be afraid to ask questions and/or ask for help throughout this process. We are here for you.

If you are considering taking multiple honors and/or Advanced Placement courses, we expect you to be thoughtful when you fill out the Time Management form, and we hope you recognize that sleep is a non-negotiable of nine hours/night. Not six hours per night... nine hours each night! Because we value your wellness, we encourage you to take no more than two AP courses per year. Taking on more often results in less sleep and the research is clear - your brain needs to recharge every night while you sleep. Please take good care of yourself in this regard.

Finally, please know we want you to choose a healthy, balanced life. We encourage you to design a program of study that is personally challenging, requires you to stretch and grow and brings you joy. Choose courses that will allow you to balance your academic priorities with the rest of your in and out of school responsibilities. We hope you select courses that will leave you with enough time to develop the necessary skills to become resilient, ethical, and motivated learners and that honors your individual interests, strengths and talents. Most importantly, we want you to enjoy your high school years, learn to love learning and have fun! This is a great time to be a Titan!

Kathie Laurence

Principal
SCHOOLWIDE LEARNER OUTCOMES (SLOs)

To achieve our mission, the Board of Education has adopted the following competencies as the basis of what we expect our students to know and be able to do when they are graduated from PAUSD:

**SLOs to be Measured by Report Card Grades**

1. Demonstrate knowledge of key concepts, principles, processes, facts, and skills in the disciplines of language arts, history-social science, mathematics, science, physical education, visual and performing arts, foreign language, career technical education, and health/practical living skills.

**SLOs to be Measured by the Rubrics**

2. Effective communication through listening, speaking, and writing
3. Strong research skills
4. Ability to integrate knowledge among disciplines
5. Reading with understanding
6. Critical and creative thinking to solve problems
7. Effective use of technology

**SLOs**

The SLOs addressed by each course are indicated for each department. Most departments indicate the SLOs addressed following each course description. The numbers correspond with the numbers indicated above.

**Homework Expectations**

To assist students in making appropriate choices for the coming school year, the hours of work expected of students outside of class time is indicated below each course description or, in some cases, at the start of course descriptions for each department.
GUNN HIGH SCHOOL

It’s a Great Day to be a Titan!

MISSION STATEMENT

The Mission of Henry M. Gunn High School is to foster a community of creative thinkers who will acquire knowledge, skills, values and integrity to: be resilient, responsible, respectful, contributing citizens; lead rewarding lives which pursue personal excellence and lifelong learning.

SCHOOL IMPROVEMENT GOALS

GOAL #1: Develop a culture that broadly defines and promotes multiple paths to success, embraces self-discovery and social-emotional well-being and values the love of learning beyond traditional metrics of achievement.

GOAL #2: Increase achievement for all learners at Gunn High School, especially our African American, Hispanic, Socio-Economically disadvantaged, English Language Learners and Special Education students.

GOAL #3: Create a comprehensive data system and align course curriculum to regularly assess student progress, inform instruction and aid communication at the classroom, department and school levels.
A common goal from the PAUSD School Board and the Gunn HS WASC School Improvement plan is “to raise the achievement of historically underrepresented (HUR) students and increase participation and success in rigorous courses at the secondary level, we will assure equity of preparation, access, opportunity, and support from Pre-K to 12th grade.” We are committed to using course enrollment practices that increase access to honors and AP courses for historically underrepresented students. All students will have the right to participate in our honors and Advanced Placement Program, as long as prerequisite coursework is successfully completed.

Our definition of successful completion of a course is aligned with the University of California System definition that a student must earn a C- or higher to demonstrate minimal proficiency.
COURSE SELECTION GUIDELINES

The school master schedule is built in the spring based upon student needs and student course requests. The schedule is constructed so that students are enrolled in courses they must have, and every effort is made to schedule the electives they would like to have. The schedule also takes into account the staff and facility parameters that affect the schedule.

Courses and schools are staffed based on student course selection in the spring. Once course sections are finalized, changes will be made only within extenuating circumstances based on approval from the Assistant Principal of Student Services. Therefore, every student should regard the schedule they receive as a contract. The school has provided the courses, and the student has the obligation to attend and participate in those courses.

All students must be enrolled in a minimum of five (5) courses to be considered full-time students. Students will not be permitted to drop a course if this puts them below the minimum required course/credit load.

</tbody>
</table>

NOTE: These course minimums may be adjusted for students with IEPs, 504s or RtI Plan.

Student Responsibilities in the Scheduling Process

1. Discuss selections with the academic teachers and inquire about the elective programs from the teachers in those areas.
2. Read and discuss the Course Catalog with your parents.
3. Consult with your counselor and Instructional Supervisors when questions arise.
4. Discuss the preliminary course selections with your parents.
5. Fill out the Time Management Form and make adjustments to your selections, as needed, to maintain a balanced life.
6. Go to the Infinite Campus Portal and select your courses. Make sure to choose alternative courses. If no alternatives are chosen and another choice needs to be made, we will find a course with low enrollment for you to take.
   • The portal is open for registration: February 5, 2018
   • The portal will close on: February 16, 2018
7. You may print the Course Request Summary for your own records.
8. Counselors will visit class rooms to go over student course requests starting the week of February 26th.
9. Students are not allowed to take two classes in the same discipline (e.g., two world language classes at the same time, two science classes at the same time) until they have satisfied or are concurrently satisfying their Palo Alto Unified School District graduation requirements in other departments (including CTE and VPA). Any exception to this policy must be approved by the instructional supervisor of the department and by the Assistant Principal of Student Services.

*Students receiving services within our EL program may follow a different procedure for course registration as outlined by the EL Coordinator*
10. Courses with low enrollment, or which are elective, may not be offered or may be offered on an alternating-year schedule.

**School’s Responsibility in Scheduling**

1. The school shall build a master schedule to support student selection and learning to the best of our ability.
2. The school shall provide appropriate support in the course selection process.
   a. Incoming 9th grade students will have course selection presentations along with the development of their Four-Year Plan in February at their respective middle school, a parent informational night (January 31), parent meetings for questions (February 7) and follow-up brief student meetings at the middle school to confirm schedule selections.
   b. Rising sophomores will have a group session with their counselor in the month of January through the SELF program. During this meeting, their Four-Year Plan will be reviewed and adjusted.
   c. Rising juniors will have course selection and four-year planning during their individual sophomore conference held between November and January.
   d. Rising seniors will have course selection and four-year planning support during assigned FLEX sessions in January.
3. The school shall review and provide a course catalog to all students electronically to support their decision making in course selection. Paper copies will be available on request.
4. **If** an Honors/AP Contract and Time Management Worksheet must be signed by both student and parent/guardian and returned to the school counselor no later than February 26 to ensure that student requests are finalized.

**Off-Campus Courses (non-PAUSD)**

Prior approval is required for a student to earn credit for all off-campus courses including college, vocational, and summer educational programs. Courses fulfilling specific graduation requirements must be taken on campus. Some courses, usually for elective credit or to make up a D or an F earned in a course may be taken off campus. Credit will be granted only for approved courses taken in an accredited school. **Prior approval forms are available in the Guidance Office.** For any course taken off campus, it is the responsibility of the student to ensure that the course is taken through an accredited institution and whether the course will be accepted by colleges.

Students who take off-campus courses for credit (for example, through approved foreign language schools or community colleges) should be aware that a maximum of 40 units can be counted toward a high school diploma. **All courses taken off-campus require the prior approval** of the department Instructional Supervisor, student’s counselor and Assistant Principal of Student Services. Students wishing to take community college courses must first obtain the written permission of the Assistant Principal of Guidance. Please be aware that community colleges will not allow students to take a course that is also offered at the high school. Also, courses taken at the community college are college level courses and the start of a permanent college transcript that must be included when applying to colleges. Of the elective units required to meet the 220 unit graduation requirements, no more than 40 units may be taken from off-campus producing courses and **all off-campus courses must have the prior approval** of the Assistant Principal of Student Services to be included on the student’s transcript. Courses fulfilling specific graduation requirements must be taken on-campus. The paperwork necessary to obtain prior approval can be picked up in the Guidance office.

The form for requesting prior approval is located on the Gunn Web site: http://gunn.pausd.org/sites/default/files/Off-CampusFormGunn17-18.pdf
Prioritize Graduation Requirements
Students are not allowed to take two classes in the same discipline (e.g., two world language classes at the same time, two science classes at the same time) until they have satisfied or are concurrently satisfying their Palo Alto Unified School District graduation requirements in other departments (including CTE and VPA). Any exception to this policy must be approved by the instructional supervisor of the department and by the Assistant Principal of Student Services.

Courses with low enrollment, or which are elective, may not be offered or may be offered on an alternating-year schedule.

Schedule Modifications
Gunn High School does not grant schedule changes unless the request meets one or more of the criteria listed below. Any student wishing to request a schedule modification must do so by completing the form available in the Student Services Office. The form must be completed and returned by the dates indicated in the Gunn High School Calendar of Events. Forms will be reviewed by the school counselors and administration. Your school counselor will contact you by email shortly thereafter to let you know the outcome of your request.

The criteria for a schedule change are as follows:
- Graduation requirement missing from schedule (12th only)
- Course already taken (10th-12th)
- Prerequisite – do not meet course requirements (9th-12th)
- Schedule has an error (same class listed twice, class omitted, or class requested not included) (9th-12th)
- Schedule has a class which has been taken over the summer and needs to be dropped in the fall (9th-12th)
- Schedule has a class which is not appropriate to the student’s English language proficiency level, for instance English language learners placed into English and Social Studies electives

NOTE: We cannot accommodate schedule requests or changes based on teacher preference or learning style. We strongly believe that students benefit from learning from a variety of different teachers.

Lane Changes
English Department Course Level Change Policy: The English department is dedicated to providing the best learning environment for all students. Courses with the same name do not necessarily cover the same standards and texts simultaneously. Therefore, all English course level changes must take place by the end of the second week of the semester. Such changes are contingent on the IS’s approval. The IS will consider student’s current and past performance, class size, dynamic of the class, and the overall circumstances. Our semester-long course system does allow students to initiate level changes before the start of the next semester, depending on space available in the class they want to move into.

Social Studies Department Course Level Change Policy: Students who wish to drop AP Econ to take Econ 11 during the first semester must do so by 2 weeks into the semester. Anyone dropping after that date will be placed in Econ 11 second semester. Students who wish to drop AP Psychology to take a Social Studies elective during the first semester must do so by 2 weeks into the semester. Anyone dropping after that date will be placed in a class second semester. Students wishing to move from APUSH to USH or American Studies must do so within the first 4 weeks.

Math Department Course Level Change Policy: Students choose a particular lane based on their performance in the previous course, teacher recommendation and potential summer work. Students earning a C- or below in a class can request a lane change. Such changes are contingent on class size and must be approved by the IS. Changes can only be made before the end of the 1st quarter or at the semester break. Students who change lanes during the semester will carry over their current grades to their new course. A plan for reassessing on missed learning targets will be arranged between teacher and student.

Science Department Course Level Change Policy: If students show signs of struggling before the end of the first progress reporting period, it may be possible for them to change levels of a course, but only if there is room in the alternate course and only if a major schedule change is not required. Level changes must be approved by both teachers as well as the Instructional Supervisor. All efforts will be made to support struggling students and to facilitate success (“C-” or higher) in their science courses.
Students wishing to challenge themselves in a higher level of a course may do so at the start of the school year, if there is room; however, once they have changed, they will need to stay in that course until the end of the semester. Teachers recommend that students stay in a course for the first full unit of study in order to have multiple types of assessments (quiz, test, lab report, homework) to help inform their desire to change levels.

Students interested in changing levels should contact their science teachers as soon as possible in order to discuss their options.

English language learners are correctly placed in a class if they demonstrate enough knowledge of English to earn a "C-" grade or better. At any time, if they are not able to perform at that level due to their English language proficiency, the counselor together with the EL coordinator will support the students’ lane change, or dropping of the course. (California State Board of Education Policy #98-04) (California State Board of Education Policy #98-04)

**Dropping a Course**

Students wishing to drop courses in which they are enrolled must submit a drop form with parent signatures to their counselor. Drop forms can be obtained from the Counseling Office. Students must attend the class until their schedule is officially changed.

Colleges should be notified of any changes in academic schedule if completed after the application has been sent. It is the student’s responsibility to make this notification.

A student wishing to drop a course in which s/he is enrolled and not have it appear on his/her transcript must do so by the date indicated on the academic calendar shown on the Gunn Web site.

**PLEASE NOTE:** Certain course offerings or programs may put students at risk for accidents. These courses/programs include, but are not limited to, chemistry, engineering tech, stage technology, home economics, photography, ceramics, physical education, and athletics. Parents may wish to discuss the accident potential of courses/programs with staff members before approving student enrollment.
Students are required to have 220 semester credits for graduation. Ten credits are granted for successfully completing a course that meets each day for a school year; five credits are granted for a semester course.

2018-2019 NCAA Approved Courses
For a list of NCAA approved courses, please visit the NCAA Eligibility Center at:
https://web1.ncaa.org/hsportal/exec/hsAction

The NCAA High School Code and the CEEB code are both 052347. You can use either box to find Gunn High School.
Gunn High School supports any student who wishes to enroll in Advanced Placement (AP) classes. Please remember that Advanced Placement courses are college level courses. Students should be motivated to take an AP class by an appreciation for the subject. Students who are overextended with academics and/or extracurricular activities should give careful consideration to whether they have time to devote to an AP class and also to the number of AP classes that they can successfully complete. Gunn High School suggests a maximum of two AP classes per semester.

**Students who enroll in an AP course are expected to:**

1. Be independent learners willing to read, learn, ask questions, pursue outside reading and research, integrate and discuss material from diverse sources.
2. Meet any prerequisites prior to enrolling in an AP course.
3. Prepare for and take tests on time.
4. Accept that enrollment in an AP course does not guarantee an A or B grade.
5. Spend more than the average amount of time on work outside of class.

**Students who enroll in an AP courses and their parent/guardian must sign the following written contract:**

1. I recognize that I have to demonstrate independence and responsibility. AP courses typically require more homework compared to non-AP college prep courses (approximately 40 minutes a night or 2.5 hours a week).
2. I commit to remain enrolled in the AP courses I have chosen for the entire year (or semester for AP Econ). If special circumstances arise and I must drop an AP course, I understand there may not be space available in a college prep class. I understand I may have to delay taking a required class because of my drop.
3. I understand that Gunn High School does not recommend students take more than two AP classes per year.
4. I understand there may be a prerequisite for an AP/Honors course as outlined in the Paly/Gunn course catalog. By enrolling in an AP/Honors course, I certify that I meet these prerequisites.
5. I agree to uphold Gunn High School’s Academic Integrity Policy.
6. I will speak with my parent/guardian, teacher or guidance counselor if I start feeling overwhelmed with my academic workload.
7. I realize that by enrolling in an Advanced Placement course I am expected to take the corresponding Advanced Placement Examination in May. Funding support for this examination may be available for students with demonstrated financial need.
8. I will complete the Time Management Worksheet to the best of my ability and use this tool in selecting my courses to maintain a balanced life.

**GRAPHIC DESIGN (6262) (UC Approved “f”)**

This course can be used to fulfill the Visual and Performing Arts requirement for the UC and CSU systems. This class fulfills the district Career Technical Education requirement. This is an introductory course involving studio inquiry into the nature of graphic design and visual problem solving. Topics introduced in the course are: symbols, typography, information design, visual concepts, and three-dimensional graphic design. Emphasis is placed on the basic art elements and principles that underlie all great designs—the tools and techniques needed to effectively translate visual ideas, execute the concept, and construct a design, in order to develop an understanding of how form and message create a visual language. The course also introduces the student to studio operations and procedures including traditional and digital media, client-designer relations, production processes for print media, graphic design history and cultural content, as well as written and oral components of classwork. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process. This course is open to grades 10-12.

- **Prerequisites:** Art Spectrum or equivalent
- **Homework Expectation:** 1 hour per week on average
- **District SLOs Addressed in this Course:** 1, 6, 7

### What you must have prior to taking the class

- Additional Course Information

### Course Description

**NOTE:** While care has been taken to ensure that information contained in this Course Catalog is true and correct at the time of publication, changes after the time of publication may impact on the accuracy of this information. For the most accurate and up-to-date information, please refer to the online version of the Gunn 2018-2019 Course Catalog on the Gunn Web site.
Career Technical Education (CTE) programs are designed to provide students with the communication, critical thinking, problem-solving, and technical skills required for the 21st-century workplace and global economy. The pathways and courses offered represent several of California’s 15 industry sectors. Students may complete a CTE Pathway by successfully completing two year-long courses within the same industry sector. Gunn High School offers CTE courses related to careers in Media Arts, Consumer Family Sciences, Engineering, Computer Science, Biotechnology, and Criminal Law/Legal System.

### Media Arts Courses

**VIDEO PRODUCTION - DIGITAL FILMMAKING**

**VIDEO PRODUCTION – DIGITAL FILMMAKING I (1037B)** *(UC “f” Approved)*  
*Blended Learning Course*

In this Blended Learning course students will investigate techniques of video production: directorial style, script development, camera technique, editing, etc. Evaluation of the aesthetic principles of videography, investigation of selected historical topics, and “hands-on” training in video technique will form the basis of most class sessions. Students will write, shoot, and edit short films ranging from the traditional to the avant-garde. In order to produce original digital films, students will be trained in camera technique and in the uses of non-linear editing and audio creation software applications.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.*

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** Minimal homework
- **District SLOs Addressed in this Course:** 1, 2, 4, 6, 7

**ADVANCED VIDEO PRODUCTION:**

**DIGITAL FILMMAKING II (1038B)** *(UC Approval Pending)*  
*Blended Learning Course*

This advanced course provides students with opportunities to work on individual and small group video projects. Workshop methods will be employed to provide students with understandings of advanced principles and practices of videography. Students in this course will be expected to develop project treatments, write and rewrite shooting
scripts, develop storyboards, record and edit projects. This course satisfies either the Fine Arts or Career Technical Education graduation requirement. May be repeated for credit with permission of instructor.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: Video Production: Digital Filmmaking 1, Broadcast Journalism, or Multimedia Journalism; open to all grade levels
- Homework Expectation: Minimal homework
- District SLOs Addressed in this Course: 1, 2, 4, 6, 7
- May also satisfy the VPA graduation requirement

MEDIA ARTS JOURNALISM

MULTIMEDIA JOURNALISM (5627B)*  (UC Approval Pending)  Year
Blended Learning Course

This Blended Learning course is an intensive laboratory course in gathering, writing and producing multimedia content for the Titan Broadcast Network (TBN) Web site (TitanBroadcastNetwork.com). This is an intensive laboratory course in multimedia Web communications, multimedia design, Web site content management, and streaming media with an emphasis on journalistic reporting and writing. Students will explore industry-standard motions graphics, audio editing, photo editing, and presentation applications to create visual, aural, streaming, and written projects for the Web. Students will build upon basic journalistic writing styles for podcasting and the Web. The class will stress the legalities and ethics of journalism with particular emphasis on online journalism. Students will also study media criticism and the history of the Web, as well as compare a variety of present-day Web sites. Students enrolled in Multimedia Journalism will also participate in daily broadcasts for the Gunn High School community. Students will be required to attend a weekly lab session in the broadcast studio during the 0 period (7:30am - 8:30am) to produce a live streaming video announcements show. Lab sessions will be scheduled weekly.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: None; open to all grade levels
- Homework Expectation: Multimedia productions may require additional time outside of scheduled class period. Attend weekly lab session required (GunnTV).
- District SLOs Addressed in this Course: 1, 2, 3, 4, 6, 7

BROADCAST JOURNALISM (1494B)*  (UC “g” Approved)  Year
Blended Learning Course

This Blended Learning course is an intensive laboratory course in gathering, writing and producing news for broadcast media for GunnTV on the Titan Broadcast Network (TBN). Workshop methods and “hands-on” training will be employed to provide students with an understanding of the principles of broadcast television production, video journalism, and radio. Operation of broadcast newsrooms, ethics in broadcast journalism, interviewing techniques, and media criticism will also be examined in the course. This course also serves to broadcast campus news and selected features to the Gunn High School community. Students will be required to attend a weekly lab session in the broadcast studio during the 0 period (7:30am - 8:30am) to produce a live television announcements show. Lab sessions will be scheduled weekly. Broadcasting operates as a project based classroom where collaborative groups will be responsible for creating student produced school video features. All student productions will be broadcast over television and the Web. Field video production will be applied to explore various types of programs such as student documentaries, sports and events. Speaking and interpersonal abilities are integral to this class for interviews and appearances on camera. This blended course will address the hands-on use of technology, primarily cameras, video editing software, podcasts, and Web streaming.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.
• **Prerequisites:** None; open to all grade levels
• **Homework Expectation:** Attend weekly live television lab session required (GunnTV). Video productions will require additional time outside of scheduled class period.
• **District SLOs Addressed in this Course:** 1, 2, 4, 6, 7

### ADVANCED JOURNALISM (1453)

This course produces the student-run print and online publication, *The Oracle*. Through such activities as reading and analyzing professional models, interviewing, research and writing, revising and editing, students will demonstrate the mastery of journalistic writing and ethics needed for publication of their work in the school and professional press. Students will acquire the technical skills needed for desktop publishing. Completion of Beginning Journalism (Journal 11, description is in the General Instruction courses section) is a prerequisite for this course.

• **Prerequisites:** Completion of Beginning Journalism (Journal 11) plus adviser interview are prerequisites for this course; open to grades 9-12
• **Homework Expectation:** Minimal, except during production times when students are expected to attend after-school production two times a month
• **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6, 7

### STAGE TECHNOLOGY

**STAGE TECHNOLOGY (1087)** *(NOT UC Approved)*

**STAGE TECHNOLOGY (1088)** *(NOT UC Approved)*

Semester 1
Semester 2

Stage Technology and Design is designed to integrate theoretical and practical knowledge of stage technology and design. Students will study the design and construction of sets, lighting, sound, and costumes, and apply their skills by developing design concepts and mounting productions from a variety of theatrical genres. By assuming vital roles in play productions, students will work effectively in leadership and ensemble situations, and experience the relationship of technical theatre to the theatrical event as a whole. Students will learn to operate theatrical equipment and tools safely, and use these skills to provide technical services for many school stage activities. This course satisfies the Career Technical Education Program requirement and Visual and Performing Arts requirement, and may be repeated for four years. Students who enroll in and complete Stage Technology will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

• **Prerequisites:** None; open to all grade levels
• **Homework Expectation:** None
• **District SLOs Addressed in this Course:** 4, 6, and 7
• This class meets during H Period

### ADVANCED STAGE TECHNOLOGY & DESIGN (4915)

*(NOT UC Approved)*

Year

Students will continue to practice their technical theater skills at an advanced level through working in leadership roles on Gunn Theatre Productions. They will manage and supervise a design or construction crew while drawing on their knowledge of theater history, design aesthetics, and creative processes. At the end of a production, students will be responsible for a production report, analyzing their process, successes and challenges. This course will also require students to archive their designs and experiences in a portfolio, which they will present at the end of the spring semester. This course satisfies the Career Technical Education Program requirement and Visual Performing Arts requirement, and may be repeated for three years. Students who enroll in and complete Advanced Stage Technology and Design will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

• **Prerequisites:** Successful completion of one full year of Stage Technology and Design, and approval of the instructor; open to grades 10-12
• **Homework Expectation:** 4 hours a week on average
• **District SLOs Addressed in this Course:** 4, 6, and 7
CONSUMER FAMILY SCIENCES

Experienced and beginning students have the opportunity to use their expertise and learning skills. Each course stands on its own merit and can be taken independently or in combination. The best student projects will be exhibited at various times throughout the semester.

Consumer Family Sciences Courses

CULINARY SCIENCE – INTRODUCTION (5620) (UC Approval Pending) Semester

If you have a special liking for good food, even if you have never done much more than boil water, this class is for you. If you have had lots of experience in the kitchen but want to stretch your skills, want to explore the why’s and how’s of delicious foods, this is your course, too. An art as well as a science, good cooking rests on basic principles and skills that have been refined over centuries. These principles and skills are demonstrated and practiced in class in clear, easy steps. Plunge in and have fun! Your family and friends will relish the results while you build your reputation as a terrific cook.

- Prerequisites: None; open to all grade levels
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6

CULINARY SCIENCE – INTERNATIONAL & REGIONAL (5621) (UC Approval Pending) Semester

Join a classroom tour of famous food of the regional United States, Asia, Europe, Africa and more. In addition to selecting, preparing, tasting and enjoying famous dishes typical to each region, you will learn about preparation methods, serving techniques and special equipment specific to the dishes made. If you love to cook and enjoy trying new and different foods, this eighteen-week travelogue of international culinary delights is for you!

- Prerequisites: None; open to all grade levels
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 2, 4, 5, 6

SPORTS NUTRITION (5622B)* (UC Approval Pending) Semester

This class is all about empowering students with the knowledge to create nutritionally balanced meals that will enhance sports performance as well as overall good health. Guest speakers (Athletes, Sports Trainers, Nutritionists, Former Student Athletes) will be invited into our classroom, and we will use technology to actively engage your
mind in the dynamic field of Sports Nutrition. Emphasis is placed on healthy food selection, improving nutritional value through ingredient selection, and cooking techniques that will enable students to create nutritionally balanced delicious dishes. If you are interested in eating for everyday activities or you especially have sports success on your mind; this class will prepare you for a healthy lifestyle with plenty of cooking and you will be creating and analyzing recipes to support peak performance.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

---

**FIBER ARTS & FASHION DESIGN (5613)  (UC Approval Pending)**

If you like working with fabric and creative textiles this is the class for you. In this course you will work with many different fibers and fiber applications. A few that will be covered are: quilting, embroidery, fabric painting, machine appliqué, knitting, crocheting and needlework. You will also learn to use the sewing machine to enhance your creativity. This course will allow you to create unique fabric and craft items.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

---

**INTERIOR DESIGN (5851)  (UC Approval Pending)**

Do you care about your living environment? Do you want your room and your home to reflect you? In this course you will examine your likes and dislikes and to discover and develop your own personal sense of good taste. You will create your own floor plan, select and arrange furniture, fabrics, and accessories for your “dream home.” You will learn architectural and furniture styles, line, design, form, color and texture and be able to combine them into the kind of living environment which best reflects you. You will also develop an ability to decorate on a budget and how to inexpensively change the appearance of a room.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

---

**BIOTECHNOLOGY**

**BIOTECHNOLOGY: THEORY & PRACTICES (3955)  (UC Approved “d”)**

This course will introduce students to the theoretical aspects of Biotechnology (Cell Biology, Microbiology, Molecular Biology, Immunology) and societal issues arising from this new technology. Hands on laboratory activities will reinforce theoretical information and teach lab safety, data analysis, the scientific method, and related computer skills. This course may include topical speakers from biotechnology industry and research and field trips to visit nearby biotech industry sites and labs.

- **Prerequisites:** Successful completion of Biology and Chemistry or with department approval
- **Homework Expectation:** No assigned homework. Students are given class time to complete work. Some students may need extra time to complete assignments at home.
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
- **For UC/CSU application, the course is approved “d,” Laboratory Science**
CRIMINAL LAW – LEGAL SYSTEM

CRIMINAL & CIVIL LAW (4540)  (NOT UC Approved)  Semester

This is a very exciting class that will challenge your perspective of law and punishment as we explore controversial cases and issues. Criminal and Civil Law examines the types of crimes, legal rights, as well as the civil consequences faced after a crime. Criminal and Civil Law class also examines torts, individual rights and liberties, contract law and juvenile law. A field trip to criminal court will occur and there will be guest speakers such as lawyers, a police officer, among others.

- Prerequisites: None; open to all grade levels
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6

LAW 1 (4541)  (UC Approved “g”)  Year

Law 1 is an exciting legal course targeting students who may consider a career in the legal field. This exciting course takes the students through the criminal justice system, criminal law, Constitutional law, procedural law, adjudication process and an in depth look into landmark court cases. Students also examine the Bill of Rights and how they apply to law. There are many expert guest speakers, four mock trials, debates and a field trip in this year’s course.

- Prerequisites: None; open to grades 11 and 12
- Homework Expectation: Most work is completed in class. Little to no homework.
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6

ENGINEERING

AUTOMOTIVE TECHNOLOGY 1 (5043)  (UC “g” Approved)  Year

This course assumes no previous knowledge about automobiles and their operational systems.

The course is designed for the owner/driver, and emphasizes the understanding of the operation of automotive components, consumer awareness, preventive maintenance practices, tune-up procedures, elementary trouble analysis, and minor repairs. Approximately 40 percent of the class time is devoted to discussions and demonstrations and 60 percent to related shop activities on shop units and personal automobiles. This is the type of course automobile owners wish they would have taken. Students who enroll in and complete Automotive Technology 1 will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

- Prerequisites: None; open to all grade levels
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 4, 6, 7
AUTOMOTIVE TECHNOLOGY 2 (5050) (UC Approval Pending)  

Designed for the student who desires more information, experience and proficiency related to automotive operation, repair and maintenance. Instrument troubleshooting of electrical systems, brake systems, suspension systems, and custom alignment are but a few of the topics explored in depth in the course. Vehicle design and parts construction/fabrication projects. Certain operations and projects are required but adequate time is provided for personal projects and problems. Competent students who wish to be teacher aides or desire further grooming for employment can make special arrangements for a third year of Auto with the instructor’s permission. They will be classified as teacher aides or special service. Students who enroll in and complete Automotive Technology 2 will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

- **Prerequisites:** Auto 1 or permission of the instructor; open to grades 10-12
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 4, 6, 7

INTRODUCTION TO ENGINEERING DESIGN – PLTW (8569) (UC Approved “g”)  

This course will introduce students to basic concepts of design and engineering. The course is based on curriculum provided by Project Lead the Way (PLTW) and has been customized to address Gunn High School’s Silicon Valley student population and equipment, including a state-of-the-art 3D printer. Topics include the process of design, technical sketching, CAD (computer-aided design), dimensional analysis, statistical analysis using Microsoft Excel, tolerances, reverse engineering and 3D printing. Students develop personal engineering notebooks that document skills and designs, including several projects printed on the 3D printer. Teamwork and communication skills are developed through group projects. Students in this course have the opportunity to compete in regional and statewide PLTW design competitions hosted by local tech companies and universities. In addition, students can earn an Autodesk Inventor professional certification by passing an online exam administered by Autodesk. Students who enroll in and complete Introduction to Engineering Design will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

**College Board AP + PLTW student recognition:** Students who complete two PLTW courses and a STEM (math or science) AP class, with qualifying scores on course-related exams and assessments, earn a College Board AP + PLTW certificate of preparation for more advanced coursework in college.

- **Prerequisites:** Successful completion of Algebra I. Concurrent enrollment in a college preparatory math AND science course; open to all grades
- **Homework Expectation:** Students are given class time to complete work. Some students may need additional time to complete assignments at home.
- **District SLOs addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

PRINCIPLES OF ENGINEERING AND ROBOTICS – PLTW (5090) (UC Approved “g”)  

This course will introduce basic engineering concepts to students who want to build and program their own mechanical inventions. The course is based on curriculum provided by Project Lead the Way (PLTW) and includes topics such as simple machines, energy, statics, electronics, robotic control and real-time programming, and projectile motion. Theory is applied through hands-on projects built from VEX robotics components. Students develop personal engineering notebooks that document skills, design plans and completed projects. Teamwork, problem-solving, and communication skills are developed through group projects. Students in this course also have the opportunity to compete in VEX Robotics competitions. Students who enroll in and complete Principles of Engineering and Robotics will be given special consideration during the selection process for the Gunn Robotics Team (GRT).

**College Board AP + PLTW student recognition:** Students who complete two PLTW courses and a STEM (Math or Science) AP class, with qualifying scores on course-related exams and assessments, earn College Board AP + PLTW student recognition. This recognition shows colleges that you’re prepared for advanced course work in engineering.

- **Prerequisites:** Successful completion of Algebra I. Concurrent enrollment in a college preparatory math AND science course; open to grades 10-12
- **Homework Expectation:** ~1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
Engineering Technology is a hands-on course designed to provide experience in mechanical design, machine shop skills, engineering project work and leadership. The curriculum is designed to fit the needs of both four-year-college-bound students and those interested in a two-year career tech education. Conceptual instruction begins with the design cycle, which students experience in all stages through hands-on skill development from brainstorming to prototyping to manufacturing and testing. Mechanism design and prototyping, programming, electronics, pneumatics, machining and welding, and CAD (computer-aided design) technologies are introduced to all students using industry-standard equipment. Applications of scientific principles, group dynamics, leadership and communication skills are developed in an activity-oriented approach including informal classroom challenges and two or more FIRST Robotics competitions each year.

Students who wish to enroll in Engineering Technology need to be selected as members of the Gunn Robotics Team (GRT). A selection process will be used to award spaces within GRT. Information regarding this process will be published in January. Students who have completed Introduction to Engineering Design, Principles of Engineering and Robotics, an Automotive Technology course, or a Stage Technology course will be given special consideration during the selection process.

- **Homework Expectation:** Yearlong participation in after-school and weekend activities is required. First semester 4 hours per week average, second semester (January through April) 10 hours per week average.
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

**COMPUTER SCIENCE**
COMPUTER SCIENCE COURSES

AP COMPUTER SCIENCE A  (2491B)*  
(UC Approved “g”) 
(Blended Learning Course)
Year

The course is designed to prepare students for the Advanced Placement Exam. The course includes top down design, iteration, procedures, functions, user-defined types, classes, arrays, files, sets, linked data structures, stacks, queues, pointers, binary trees, searching and sorting algorithms. The students should be able to analyze code, in terms of functionality, efficiency, readability, reusability, modularity, and meaning.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: Successful completion of Functional and Object-Oriented Programming OR enrollment in Pre-Calc, IAC, Analysis H or above, with completion of Summer Homework; open to grades 10-12
- Homework Expectation: 4 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6, 7
- This is an advanced placement course

AP COMPUTER SCIENCE PRINCIPLES  (8635)  
(UC Approved “g”) 
Year

AP Computer Science Principles introduces students to the central ideas of computer science, inviting students to develop the computational thinking vital for success across multiple disciplines. The course is unique in its focus on fostering students to be creative and encouraging students to apply creative processes when developing computational artifacts. Students design and implement innovative solutions using an iterative process similar to what artists, writers, computer scientists, and engineers use to bring ideas to life. They will also develop effective communication and collaboration skills, working individually and collaboratively to solve problems, and discussing and writing about the importance of these problems and the impacts to their community, society, and the world. This course was previously called Computer Science Principles and was a semester-long class.

- Prerequisites: None
- Homework Expectation: 0-1 hours per week
- May qualify for Math credits
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6

FUNCTIONAL & OBJECT-ORIENTED PROGRAMMING  (8634)  
(UC Approved “g”) 
Year

This project-based course introduces the student to the functional and object-oriented programming paradigms. It includes concepts such as functions, conditionals, data abstraction, recursion, lambda, higher-order functions, lists, loops, arrays, interfaces, inheritance, and polymorphism. Some projects throughout the year will consist of creating small games, simulating real-world processes, taking apart a computer, and producing graphically interesting programs (such as Conway's Game of Life) in which almost all of these big ideas are needed.

- Prerequisites: Completion of AP Computer Science Principles OR enrollment in Geometry H, Alg 2, Alg2/TrigA, Alg 2/Trig H or above
- Homework Expectation: 1-1.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6, 7
- This is a college prep course

COMPUTER SCIENCE CAPSTONE   (8638)  
(UC “g” Approved) 
Year

This course allows students to apply their computational skills in a real-world context. Students will work in teams to use the design thinking process to identify a problem within their local community and then develop a possible solution. Students will work with mentors related to their problem areas and the teacher of the course will facilitate the design-thinking process and support students in managing their projects. The course will culminate in a public presentation of their yearlong project.
PROGRAMMING FOR MOBILE DEVICES (2492B)* (NOT UC Approved) Semester

The blended course, Programming for Mobile Devices, introduces students to mobile application development. This semester-long course will cover many topics not found in other computer science courses, such as: managing lifecycles, databases (including SQLite), background threading, and best practices for memory-efficient coding. This hands-on course will culminate in a final project in which students create and produce a unique application to be published on the Google Play marketplace.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: 10th-12th grade students who successfully complete Functional & Object-Oriented Programming or are concurrently enrolled in AP Computer Science
- Homework Expectation: 1-1.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6

WORK EXPERIENCE

WORK EXPERIENCE PROGRAM (8484) (NOT UC Approved) First Semester
WORK EXPERIENCE PROGRAM (8486) (NOT UC Approved) Second Semester

Participation in the Work Experience Program has three options available: a) Students are NOT required to have a job to be in class; b) Students that are not currently employed but are looking for employment will receive help from the Coordinator/Teacher; c) Students are currently employed (minimum age 16 and/or grade 11/12 status). You do not need to have a job to be in the class. Paly classes meet in P-02 and Gunn classes meet in C-04. Work Experience is a program that combines classroom instruction with part-time student employment. Juniors and seniors are eligible to enroll in this program. Attain your own job (some boundary limits) or the Work Experience teacher will help you find a job. Work Experience students are given the first opportunity to apply and interview for jobs but employment cannot be guaranteed. Excellent opportunity to learn interviewing skills for college and employment and the necessary soft skills required by employers.

Variable credit is based on the number of hours worked during the semester and on class attendance. Students may attend class at either Gunn or Paly. Classes are held on Tuesdays from 3:05-3:55 p.m. at Paly. Students do not have to have a job to take this class and still earn 1.5 credits.

All businesses must comply with labor laws and regulations concerning Workers’ Compensation Insurance, Social Security, and Income Taxes. An employer-employee relationship must exist. Work Experience qualifies for the Career Technical Education credit. Sign up for WEEP period H.

For more information see the Work Experience Coordinator/Teacher at Gunn 354-8221 or Paly 329-3816.

- Prerequisites: None; open to grades 11-12
- District SLOs Addressed in this Course: 1, 2, 4, 6

EXPLORATORY EXPERIENCE (8421) (NOT UC Approved) Semester

Exploratory Experience is an unpaid off-campus course that provides students with an opportunity to explore their specific career interests by direct observation and a hands-on experience. Professionals or individuals with established expertise serve as mentors in their specific fields for students in this program. Placement in this program is limited to experiences that are developed through the school district and excludes community organizations such as clubs, private lessons, and non-career focused service. Students are not enrolled until they have met with the coordinator and a suitable post is located. Exploratory Experience-class meets with the Work Experience class and
students may attend class at either Gunn or Paly. Classes are held on Tuesdays from 6:00-6:50 p.m. at Gunn and from 3:05-3:55 p.m. at Paly.

Exploratory students register for both Work Experience and Exploratory Experience class. Exploratory Experience qualifies for Career Technical Education credit. Sign up for Exploratory Experience, period H.

For more information see the Work Experience Coordinator/Teacher at Gunn 354-8221 or Paly 329-3816.

- **Prerequisites:** None; open to grades 10-12
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

### ADVANCED AUTHENTIC RESEARCH (AAR) (8429)  (UC Approved “g”)

The Advanced Authentic Research (AAR) Program is a unique opportunity for students in grades 10-12 where it is designed for students with interest, passion, curiosity, and perseverance to investigate an authentic topic of their choosing. Students are paired with mentors in the particular field of research who will support and facilitate each students' work in their own laboratories, offices, and other settings. The student research will be supported by the process-oriented curriculum developed by the AAR Team. The recursive nature of the research process allows students to go back and forth between the different stages of inquiry as they encounter new information. The expectation is that students will spend about 60 hours per semester (about 4 hours per week) on their project.

- (8429): During regular school day (A-G periods)
- (8429-H): Tu, Th (H period)

The expectation is that students will spend approximately 3-4 hours per week, including class meeting time, on their project.

- **Prerequisite:** None
- **Homework Expectation:** 3-4 hours per week
- Please see page 69 in the General Elective section of the course catalog for information about AAR-AP Seminar (8401)
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6
- For more information, please visit: http://aar.pausd.org

The English program at Gunn High School focuses on the traditional concerns of the discipline—literature, composition, language, and grammar. Literature serves as a resource for the study of ideas, culture, and values, as well as the development of composition skills. The study of composition and writing emphasizes the art and the craft, the organization and the support, and the clear and effective use of language in its written forms. Vocabulary, language, and grammar studies are integrated with the study of literature and composition.

The Gunn English program consists of a four-year required sequence of both required and elective semester-long courses designed to meet students’ needs in literature, composition, and language study. The complete sequence includes required courses in American, World, Contemporary, and Western Literatures, as well as in communication skills and literary genres.

In 2018-2019, students in grades 9 and 10 should enroll for the two courses required of freshmen and sophomores. They should indicate on their Course Request forms a choice of (a) one semester of Contemporary Writers (College Prep) or Contemporary Heritage (Advanced) AND (b) one semester of Writer’s Voice (College Prep) or Literary Style (Advanced). The other two required courses for grades nine and ten will be offered the following year. The choice of college prep or advanced should be made with consideration of prior performance in English classes, work habits, development of skills, and academic interests. Consultation with a student’s current English teacher and counselor may be helpful in making a choice.

*GRADE 12 ONLY: Students may take the yearlong AP English Literature and Composition (Course #1279) instead of 2 semester-long English courses. Taking AP English indicates a commitment to taking the AP Examination in Literature and Composition in May.

In 2018-2019, students in grades 11 and 12 will select one required semester of either American Literature (College Prep) or American Classics (H), a course that carries an “honors” designation on the transcript. In addition, students in grades 11 and 12 should indicate on their Course Request forms a choice of one semester-long elective and two alternate elective selections. It is very important to make accurate and thoughtful selections on this form so that the department schedule accurately reflects students’ choices; requests made later are often difficult or impossible to satisfy, and courses with insufficient initial enrollment, may not be offered through the department. Students in grade 12 may also choose to take the yearlong AP English Literature & Composition course instead of 2 semester long English courses.
SLOs & HOMEWORK EXPECTATIONS FOR ENGLISH COURSES

The four-year sequence of English courses provides students opportunities to demonstrate competence in all areas of the Schoolwide Learner Outcomes (SLOs). Each course places particular emphasis on the following three SLOs: (2) effective communication through listening, speaking, and writing; (5) reading with understanding; and (6) critical and creative thinking to solve problems.

By the nature of the discipline, the study of English will take some learners longer than others. In addition, due to the cycles of long- and short-term projects, a statement of the amount of time required for homework is only an estimation and an average. Homework for English generally comprises reading, writing, and the study of vocabulary. Advanced and honors courses, including AP English Literature and Composition, may require an average of three to five hours per week of work outside of class; regular and elective courses usually require less time.

CONTEMPORARY WRITERS (1190) (UC Approved “b”) Semester

This course is for students who want a college prep program in high school English and uses the works and ideas of modern writers such as Harper Lee, Khaled Hosseini, and Julia Alvarez as the focus for studying literature and composition at the high school level. Because it is a required course, it includes particular emphasis on instruction in reading and writing. One semester of this course or Contemporary Heritage is required for graduation.

- Prerequisites: None; Grades 9 & 10
- Homework Expectation: 2 hours a week
- District SLOs addressed in this Course: 1, 2, 5, 6

CONTEMPORARY HERITAGE (1191) (UC Approved “b”) Semester
CONTEMPORARY HERITAGE SLC (9409)* (UC Approved “b”) Semester

This course is for students who want an advanced program in high school English and uses the work of modern writers such as Harper Lee, Khaled Hosseini, Charles Dickens, and Julia Alvarez to explore the sources of contemporary trends and thought in literature and composition. Because this is a required course, it includes particular emphasis on instruction in reading and writing. One semester of this course or Contemporary Writers is required for graduation.

*This is the Small Learning Community (SLC) section of the Contemporary Heritage class. Please see page 70 for a description of the SLC program.

- Prerequisites: None; Grades 9 & 10
- Homework Expectation: 2-3 hours a week
- District SLOs addressed in this Course: 1, 2, 5, 6

WRITER’S VOICE (1192) (UC Approved “b”) Semester

This college prep course introduces students to the writer’s choices for communicating a message through the variety of literary types: a Shakespearean drama, a memoir, short stories, poetry, and a novel. Because it is a required course, the works provide the resources for particular emphasis on instruction in reading and literature, writing and composition. One semester of this course or Literary Style is required for graduation.

- Prerequisites: None; Grades 9 & 10
- Homework Expectation: 2 hours a week
- District SLOs addressed in this Course: 1, 2, 5, 6

LITERARY STYLE (1193) (UC Approved “b”) Semester
LITERARY STYLE SLC (9410)* (UC Approved “b”) Semester

This course introduces students in an advanced English program to the writer’s options in literary genres such as drama, memoir, short story, novel, and poetry. Because it is a required course, the works of writers such as...
Shakespeare, Golding, and Angelou provide the resources for particular emphasis on instruction in reading and literature, writing and composition. One semester of this course or Writer’s Voice is required for graduation.

*This is the Small Learning Community (SLC) section of the Literary Style class. Please see page 70 for a description of the SLC program.

- Prerequisites: None; Grades 9 & 10
- Homework Expectation: 2-3 hours a week
- District SLOs addressed in this Course: 1, 2, 5, 6

**American Literature (1263)**

This college prep course for students uses the works of important American writers such as Fitzgerald, Steinbeck, Morrison, and Tan as the focus for studying the composition and literature as well as American thought and values. It is a required course, it includes a particular emphasis on instruction in reading and writing. One semester of this course or American Classics H is required for graduation.

- Prerequisites: Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- Homework Expectation: 2-3 hours a week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This class is a College Prep Class

**American Classics H (1309)**

This advanced course for students uses the works of major American writers such as Fitzgerald, Steinbeck, Morrison, and Tan as the source of studying composition and literature as well as American thought, culture, and values. As a required course, it includes a particular emphasis on instruction in reading and writing. One semester of this course or American Literature is required for graduation.

- Prerequisites: Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- Homework Expectation: 2-3.5 hours a week
- District SLOs Addressed in this Course: 1, 2, 5, 6

**English Elective Courses**

These courses are open only to juniors and seniors, may not be repeated for credit, and will be offered annually only if there is sufficient enrollment. All electives meet the UC specifications for a significant reading and writing component unless otherwise indicated.

**BASIC COLLEGE SKILLS (1512B)**

*Blended Learning Course*

This course focuses on basic preparation for college and beyond. In addition to grammar, vocabulary, writing, and SAT/ACT preparation, this course also works on the college essay, college search, scholarship search, and resume building for jobs and internships. Instruction centers on the requisite skills: critical thinking (reading comprehension), vocabulary development, sentence completion techniques, effective timed essay writing, and thorough teaching of grammar in order to prepare students for success in college, from the application process through degree attainment.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- Homework Expectation: 1-1.5 hours a week
- District SLOs Addressed in this Course: 1, 2, 5, 6, 7
- Open to both 11th and 12th graders in the fall, but only to 11th graders in the spring
- This is a college prep course
THE WORKS OF SHAKESPEARE  (1364)  
(UC Approved “b”)  
Semester

Afraid of being called a “beetle-headed, flap-ear’d knave”? Learn the language to fight back. This course introduces the students to the range of Shakespeare’s plays, including comedies, tragedies and histories, and to his sonnets. The course will also introduce students to Shakespeare’s language and times. Students need not be experts in Shakespearean plays to enroll in the course. Experts and novices alike are welcome.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 3 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

ESCAPE LITERATURE  (1384)

This course explores three of the most popular forms of modern fiction—mystery, science fiction and horror. From the clever antics of Sherlock Holmes to the dark crevices of Dr. Frankenstein’s lab, students will get a taste for both the groundbreaking works of each form, as well as offerings from modern day writers. We will do both expository and creative writing and a variety of individual and group projects related to the stories and books we read.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 2-2.5 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

CLASSIC MYTHOLOGY  (1469)

The mythology and literature of ancient Greece and Rome is the focus of this multidisciplinary elective for juniors and seniors. The course will touch on the essentials - the gods of Mt. Olympus, the heroes who carried out amazing feats, and the many stories of tragedy, love, humor and adventure. Students will read both ancient and modern versions of the myths and demonstrate their knowledge through a mix of writing, visual arts, performance and research-based activities.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 2-2.5 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

DRAMATIC LITERATURE IN PERFORMANCE  (1203)*

This interdisciplinary course for juniors and seniors offers students five units of English and five units of Drama credit. Students will enrich their study of a variety of plays as literary texts with hands-on experiences involving every facet of creating the “living” play. Students need not have extensive acting experience. Offered in alternate years.

- **Prerequisites:** Successful completion of ninth and tenth grade UC Approved “b” courses; Grades 11 & 12
- **Homework Expectation:** 3 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 4, 5, 6

*Students must be concurrently enrolled in Theatre 3 (1076) or Theater 4 (1097)

FILM AS COMPOSITION IN LITERATURE  (1332)

(UC Approved “b”)  
Semester

This course relates composition in the motion picture to student reading and writing. It introduces the art and technique of film through a history of the film and a study of its genre and directors. Activities help the student explore film as art and as composition.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 1 hour a week, but can be more depending on major writing assignments
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course
- This course is not NCAA approved
ANALYSIS OF THE WRITER’S CRAFT  (7601)  
(UC Approved “b”)  
Semester

In this creative writing course, students will have the opportunity to write memoir, short fiction, and poetry, as well as to experiment with innovative forms. We will focus on developing a strong, authentic voice, developing scenes, and understanding effective structure. Students will write daily and will regularly share their work with other students. The course is recommended only for those who understand that the best writing comes from both creativity and discipline.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** Approximately two hours per week, but can be longer when students are working on stories
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course
- Students wishing to continue their studies in English may re-enroll in this course for Elective credit

PHILOSOPHY THROUGH LITERATURE  (1179)  
(UC Approved “b”)  
Semester

“Too often we enjoy the comfort of opinion without the discomfort of thought” – John F. Kennedy

Over the course of the semester we will explore nearly three thousand years of humanity’s most pressing questions: What is real? Do we have free will? Does God exist? Can we create a just society? In this case we will use a wide range of literature and primary sources ranging from Plato’s *Allegory of the Cave* to Descartes’ *Meditations* to Jean Paul Sartre’s *No Exit*. Students will discuss, debate, and write their own philosophies on life and the world around them.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 1-3 hours a week, depending on major writing assignments
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

AP ENGLISH LITERATURE & COMPOSITION  (1279)  
(UC Approved “b”)  
Year

This advanced study course is open to seniors who have successfully completed three years of English credit (UC “b” category). The focus is on college-level work in reading and writing, culminating in preparation for the Advanced Placement Examination in English Literature and Composition. Accepting enrollment in this course indicates a student’s commitment to taking the AP Examination in Literature and Composition in the spring.

- **Prerequisites:** Successful completion of three years of UC Approved “b” courses; grade 12
- **Homework Expectation:** 3-4 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is an Advanced Placement course

READING BETWEEN THE LINES  (1521B)*  
(Expository Reading & Writing)  
Blended Learning Course  
Semester

This course is designed for the college-bound student who wants to strengthen reading, writing and critical thinking skills in preparation for university-level demands. Since the course was designed to mesh with The Expository Reading and Writing Course, the majority of our reading will be non-fiction texts drawn from a variety of disciplines. We also explore contemporary plays about global issues, make space for free reading assignments, and include a creative writing unit in which students convey their learning across the disciplines through narrative. We do most of our reading outside of class, with a focus on developing strategies to help students understand even the most difficult content and text structures. During class meetings we have lively discussions, play-reading time, and instruction in argumentative writing. By the end of the course, students will read more widely, more skillfully, and with more enjoyment than before.
*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- **Prerequisites:** Successful completion of two years of UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 4-5 hours a week, with 3 hours for the outside of class reading time
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

### AMERICAN STUDIES (1288)*

This yearlong interdisciplinary course for juniors combines the study of U.S. History and American Literature. In this course, students will explore American culture and history through the use of historical documents and readings from a wide range of classic authors, from F. Scott Fitzgerald to Toni Morrison. In addition, the course incorporates the art, music, film, fashion, and popular culture of the 20th century in American society. Through field trips, students have the opportunity to explore the rich history of the Bay Area. American Studies offers five units of U.S. History and five units of English credit per semester. Students must enroll in American Studies for both U.S. History and English.

- **Prerequisites:** Successful completion of ninth and tenth grade UC Approved “b” courses; Grade 11
- **Homework Expectation:** 2-3.5 hours a week
- **District SLOs addressed in this course:** 1, 2, 5, 6

*Student must be concurrently enrolled in the corresponding History/Social Science course American Studies (1694)*

### THE ART OF VISUAL STORYTELLING (1522)

This course introduces students to a unique genre of literature: the graphic novel. After mastering the basic terms for graphic novel composition, the students will dive into contemporary works and analyze how the combination of art and words impact character development and the structure of the text. We will examine how the graphic novel format can be utilized for sensitive subject matter such as Holocaust survivor narratives. Students will explore the development of superhero stories and discover the impact of other literary genres on superhero texts. Finally, we will delve into manga in order to compare and contrast Eastern and Western styles.

- **Prerequisites:** Successful completion of 9th and 10th grade UC Approved “b” courses; grades 11 and 12
- **Homework Expectation:** 1.5 hours a week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6

### WOMEN WRITERS (1314)*

This one-semester course is open to juniors and seniors as an interdisciplinary History and English elective. We will look at the history of women in America as it plays out in both historical and literary contexts. Students will understand what led to the women’s movement, particularly in America, and study current female perspectives via nonfiction and fiction. A goal of this course is to present women’s history and literature as important components of United States culture and as a unique subject of study.

- **Homework Expectation:** 2 hours a week, per class
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This class is a College Prep Class

*Student must be concurrently enrolled in History of Women in America (1606)
### History - Social Science

#### World History (1625)

**World History SLC (9343)** *(UC Approved “a”)*  
*Year*

World History covers important historical events in the world, from the Age of Enlightenment through birth of the Cold War. The content focuses on major historical eras and impacts such as: The Age of Absolutism, World War One and World War Two. Special attention is given to the social, political and economic developments as a result of all of these major eras.

*This is the Small Learning Community (SLC) section of the World History class. Please see page 70 for a description of the SLC program.

- **Prerequisites:** None; grade 9  
- **Homework Expectation:** Approximately 2 hours per week  
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

#### Contemporary World History (1641)

**Semester**

In this course, concepts from the social sciences are used to explore contemporary global issues. Special emphasis is given to non-Western regions, especially Africa, Latin America, and the Middle East and Asia.

- **Prerequisites:** None; grade 10  
- **Homework Expectation:** Approximately 2 hours per week  
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

#### US Government (1753)

**Semester**

This one-semester course explores the constitutional foundations of American government, the decision-making processes within and between the legislative, executive, and judicial branches of government and the changes which have occurred over time. Our rights and responsibilities as American citizens are also stressed together with the electoral process and issues of politics and the media.

- **Prerequisites:** None; grade 10  
- **Homework Expectation:** Approximately 2 hours per week  
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

#### United States History (1686)

**Year**

This class begins with a review of pre-Civil War America, but its main emphasis is on the period following the Civil War through the present day. The content focuses on major turning points in US history, primarily social, political, and economic themes.

- **Prerequisites:** None; grade 11  
- **Homework Expectation:** Approximately 2 hours per week  
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

#### AP United States History (1699)

**Year**

This course provides an in-depth survey of US History, including intellectual, political, cultural, social, and diplomatic history. The class format focuses on writing and large and small group discussions, as well as lectures and primary source analysis. It also includes independent research, debates, and guest speakers. In addition to the text, each student will read a variety of books on historical topics and issues. Students are encouraged to take the AP test in May for college credit. Summer reading is expected.
• Prerequisites: None; grade 11
• Homework Expectation: Approximately 5 hours per week (with possibly more in the 3 weeks before the AP test)
• District SLOs Addressed in this Course: 1, 2, 3, 5, 6

AMERICAN STUDIES (1694)* *(UC Approved “b”) Year

This year-long interdisciplinary course combines the study of U.S. History and American Literature. In this course, students will explore American culture and history through the use of historical documents and readings from a wide range of classic authors, from F. Scott Fitzgerald to Toni Morrison. In addition, the course incorporates the art, music, film, and popular culture of the 20th century in American society. Through field trips, students have the opportunity to explore the rich history of the Bay Area. American Studies is open to juniors only, and fulfills the US History requirement as well as the American Literature requirement for English.

• Homework Expectation: 2 hours a week, per class, open to grade 11
• District SLOs Addressed in this Course: 1, 2, 5, 6
• This class is a College Prep Class

*Students must be concurrently enrolled in the corresponding English course American Studies (1288)

ECONOMICS (1815) *(UC Approved “g”) Semester

This one-semester course covers basic micro and macroeconomic theory, including supply and demand theory, market structures, the role of government in the economy, and issues of economic development. While the emphasis is primarily on the United States economy and an introduction to business, the analytical skills needed to be an educated consumer in a global economy are also stressed.

• Prerequisites: None; grade 12
• Homework Expectation: Approximately 1-2 hours per week
• District SLOs Addressed in this Course: 1, 2, 3, 5, 6

PSYCHOLOGY (1842) *(UC Approved “g”) Semester

This one-semester course introduces the student to the science of human behavior and mental processes. It explores the biological roots of behavior and such concepts as learning and development, neuroscience, perception and sensation, disorders, and states of consciousness.

• Prerequisites: None; grades 11-12
• Homework Expectation: Approximately 2 hours per week
• District SLOs Addressed in this Course: 1, 2, 3, 5, 6

AP PSYCHOLOGY (1859) *(UC Approved “g”) Year

This college-level introductory course will cover the many facets of the science of psychology, including biological roots of behavior, learning, thinking and language, developmental and abnormal psychology, personality theory and research methodology. Students are encouraged to take the AP test in May for college credit.

• Prerequisites: None; grade 12
• Homework Expectation: Approximately 3-5 hours per week (with possibly more in the 3 weeks before the AP test and before major tests)
• District SLOs Addressed in this Course: 1, 2, 3, 5, 6

AP ECONOMICS (MICRO & MACRO) (1811) *(UC Approved “g”) Year

The course will follow the syllabus approved by the College Board. The first semester’s work will focus on microeconomics. The second semester will cover macroeconomics. Students are encouraged to take the AP examinations in micro and macroeconomics.
*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.*

- **Prerequisites:** None; grade 12
- **Homework Expectation:** Approximately 0-3 hours per week (with possibly more prior to the AP exams)
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

### POSITIVE PSYCHOLOGY (1847)  
**Semester**

Positive psychology is a recent branch of psychology that stems from Humanistic Psychology. It's aim is "to find and nurture genius and talent" (Compton 2005), and "to make normal life more fulfilling." Students will be exposed to the theoretical pillars of this discipline and will apply this theory to their own life. Through a series of in class and at home activities, students will not only grow academically but personally as well. Students who have taken positive psychology and personal empowerment classes in the past have reported a significant increase in positive self-image, focus, creativity, curiosity, and general level of happiness.

- **Prerequisites:** None; grades 11-12
- **Homework Expectation:** Approximately 0-3 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

### US FOREIGN POLICY HONORS (1769)  
**Semester**

This one-semester course is designed to help students better understand US foreign policy. The course will begin with a very brief review of the Cold War and then continue with case studies and history of US policy in Central America, Eastern Europe and the former USSR, the Middle East, Africa, and Asia. Some of the questions we will examine include: Is there a "New World Order"? To what degree can or should we depend upon alliances to steer policy decisions in the future? What values and interests should be reflected in the foreign policy we create for an increasingly interdependent world? There are no unit exams; assessment is based upon policy papers, presentations and seminar participation for each unit.

- **Prerequisites:** None; grades 11-12
- **Homework Expectation:** 2-3 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

### HOLOCAUST (1604)  
**Semester**

This one semester course is open to juniors and seniors as a social studies elective. While examining various genocides, students will examine responses to these events. Exploring the psychological roots and the social context of genocide, students will evaluate the behavior of rescuers, by-standards, victims and perpetrators. Students will study the nature of prejudice and historic roots of racism.

- **Prerequisites:** None; grades 11-12
- **Homework Expectation:** 1-2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

### COLD WAR (1850)  
**Semester**

This semester course is open to juniors and seniors as a Social Studies elective. Major issues of the Cold War are analyzed and discussed using documentary films, literature, primary source documents, and newly-released archival footage. Topics include the impact of the Cold War on third world nations, superpower struggles for dominance, the arms and space races, espionage, the fall of communism, and Cold War legacies.

- **Prerequisites:** None; Grade 11-12
- **Homework Expectation:** 1-2 hours per week.
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6
ETHNIC STUDIES (1953)  

Ethnic Studies courses operate from the consideration that race and racism, have been, and continue to be, profoundly powerful social and cultural forces in American society. The class will examine California as a microcosm of the United States and focus on themes of social justice, social responsibility, and social change. Ethnic Studies will use primary and secondary sources, class discussion, and a research project as the basis for inquiry into the issues that are raised in the essential question of this course - What is the role of ethnicity in the American Experience?

- Prerequisites: None; Grade 11-12
- Homework Expectation: 1-2 hours per week.
- District SLOs Addressed in this Course: 1, 2, 3, 5, 6

HISTORY OF WOMEN IN AMERICA (1606)*  

This one-semester course is open to juniors and seniors as an interdisciplinary History and English elective. We will look at the history of women in America as it plays out in both historical and literary contexts. Students will understand what led to the women’s movement, particularly in America, and study current female perspectives via nonfiction and fiction. A goal of this course is to present women’s history and literature as important components of United States culture and as a unique subject of study.

- Homework Expectation: 2 hours a week, per class
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This class is a College Prep Class

*Students must be concurrently enrolled in the corresponding English course Women Writers (1314)
Mathematics is offered in three college preparatory sequences. Students who are new to PAUSD are recommended for a math course based on the results of a placement test.

Our college prep pathway is a four-year sequence that prepares students for their first calculus course in college. It begins with Algebra and also includes Geometry, Alg 2 and Pre-Calculus. Students who have completed Algebra in middle school should enroll in the advanced or honors pathways. **NOTE:** Students who complete Algebra in 9th grade may choose to follow the advanced pathway starting in 10th grade.

The advanced sequence takes students through Advanced Placement AB Calculus, and prepares them to finish “C Calculus” in college. The course sequence includes Geometry A, Algebra2/TrigA, Intro to Analysis and Calculus, and Advanced Placement AB Calculus.

The most rigorous course of study is a four-year honors sequence that culminates with the Advanced Placement BC Calculus. This course sequence includes Geometry H, Algebra2/TrigH, Analysis Honors, and Advanced Placement BC Calculus.

It is possible for students to change between lanes over the course of their math education. Your student’s counselor, math teacher, and the Math Instructional Lead can help with such decisions. Students showing academic responsibility, independence, and mastery on current year assessments might consider moving up a lane. Students not meeting these requirements are encouraged to speak with the IL for support choosing a new lane. Changing lanes may require summer work.

Elective courses include BEAM (Business, Entrepreneurship, and Mathematics), Advanced Placement Statistics, and Applied Math.

ALGEBRA 1 (2348)  
(UC Approved “c”)  
Year

Students study the applications of linear and quadratic functions. Students learn properties of real numbers, solve linear equations and inequalities, graph–linear equations, equations and inequalities with absolute value, solve systems of linear equations and inequalities, simplify exponential expressions, graph and solve quadratic equations and use factoring and the quadratic formula. Students will summarize, represent and interpret data for single count variables, and analyze scatter plots for two quantitative variables. Students learn how to simplify irrational expressions, solve equations with square roots.

- Prerequisites: Completion of 8th grade math
- Homework Expectation: 1.5 hours a week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This is a college prep course

GEOMETRY (2357)  
(UC Approved “c”)  
Year

Students study Euclidean Geometry including points, lines, angles, triangles, circles, polygons, solids, constructions, transformations and introductory right triangle trigonometry. The course includes deductive reasoning and two-column proofs. It emphasizes transformational geometry and incorporates algebra review as appropriate. Students study the rules of probability including conditional probability, probability of compound events, and using probability to make decisions.

- Prerequisites: Successful completion of Algebra
- Homework Expectation: 1.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This is a college prep course

GEOMETRY A (2358)  
(UC Approved “c”)  
Year

In addition to the objectives of the Geometry curriculum, analytic geometry and transformations are studied in greater depth. Students also begin an extensive inferential logic unit. Students are expected to work more independently, have strong algebra skills and solve more challenging problems.

- Prerequisites: Successful completion of Algebra; open to grades 9 and 10
- Homework Expectation: 2.0 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This is an advanced course

GEOMETRY H (2408)  
(UC Approved “c”)  
Year

In addition to the objectives of the Geometry A curriculum, students study an extensive inferential logic unit including truth validity and tautologies, complete conditional, direct and indirect proofs. Students are expected to be highly motivated to learn about mathematics and have exceptional algebra skills.

- Prerequisites: Successful completion of an Algebra course; open to grade 9
- Homework Expectation: 2.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This is an honors course

ALGEBRA 2 (2380)  
(UC Approved “c”)  
Year

Students study families of functions including: linear, quadratic, polynomial, exponential, logarithmic, rational, and radical functions. Students extend the domain of trigonometric functions using the unit circle and model periodic phenomena with trigonometric functions. Other topics include: complex numbers, interpreting categorical/quantitative data and using regression to interpret data. A graphing calculator is encouraged but not required for this course. Students will learn enough trigonometry in this class to be prepared to take AP Physics 1 the following year.

- Prerequisites: Successful completion of an Algebra course and a Geometry course; open to grades 10, 11 and 12
- Homework Expectation: 2.0 hours or less per week
- District SLOs Addressed in this Course: 1, 2, 5, 6
- This is a college prep course
**ALGEBRA 2/ TRIGONOMETRY A (2365)** (UC Approved “c”) Year

In addition to the objectives of the Algebra 2 curriculum, students study circular trigonometry in greater depth including trig identities, trigonometric applications, and solving trigonometric equations. Basic counting principles are introduced. A graphing calculator is required for this course.

*This is the Blended Learning version of this course. Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.*

- **Prerequisites:** Successful completion of an Algebra course and a Geometry course; open to grades 10 and 11
- **Homework Expectation:** 2.5 hours per week
- This is an advanced course
- **District SLOs Addressed in this Course:** 1, 2, 5, 6, 7

---

**ALGEBRA 2 / TRIGONOMETRY A (2365B)*** (UC Approved “c”) Year

This course covers content similar to Alg2/TrigA but with a greater emphasis on proof and problem-solving. In each unit, students are expected to apply their understanding of the content to solve problems that are similar but not identical to problems solved in class. Additional content includes an in depth study of conic sections, as well as arithmetic and geometric sequences and series, law of sines and cosines, and vectors.

- **Prerequisite:** Successful completion of an introductory Algebra course and a Geometry course; open to grades 9 and 10
- **Homework Expectation:** 3 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6, 7
- This is an honors course

---

**PRE-CALCULUS (2371)** (UC Approved “c”) Year

Students review exponential, logarithmic and rational functions and study trigonometry including trigonometric identities, law of sines and cosines, trigonometric applications and solving trigonometric equations.

Additional topics include vectors, parametric and polar functions, matrices, sequence and series and an introduction to limits and calculus.

- **Prerequisites:** Successful completion of Algebra 2; open to grades 11 and 12
- **Homework Expectation:** 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is a college prep course

---

**INTRODUCTION TO ANALYSIS & CALCULUS (2385)** (UC Approved “c”) Year

Students will build on their knowledge of functions and explore new topics including: vectors, polar functions, logistic functions, parametric functions, probability, combinatorics, matrices, sequences, series, and statistics. The fourth quarter of the year will focus on limits and an introduction of calculus including the derivative. A graphing calculator is required.

- **Prerequisites:** Successful completion of Algebra 2 and a complete Trigonometry course; open to grades 11 and 12
- **Homework Expectation:** 2.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6
- This is an advanced course

---

**ANALYSIS H (2399)** (UC Approved “c”) Year

In addition to the objectives of IAC course, students study Group Theory, Algebraic Problem Solving, 3-dimensional graphing, and more applications of Matrices, such as transformations and Markov Chains. The course concludes with the beginning of calculus including limits, difference quotients, derivatives and an introduction to the indefinite integral. A graphing calculator is required.
• Prerequisites: Successful completion of Algebra 2 and a complete Trigonometry course; open to grades 10 and 11
• Homework Expectation: 3 hours per week
• District SLOs Addressed in this Course: 1, 2, 5, 6
• This is an honors course

AP AB CALCULUS (2449) (UC Approved “c”) Year

Students study the equivalent of the first semester of a yearlong college calculus course. Students develop their understanding of limit, derivative, definite integral, and the indefinite integral. Students represent their work algebraically, graphically, numerically and verbally. A graphing calculator is required for this course. Students may choose to take the Advanced Placement Exam in Calculus AB.

• Prerequisites: Successful completion of Pre-Calculus, Introductory Analysis and Calculus, or Analysis Honors; open to grade 12
• Homework Expectation: 3 hours per week
• District SLOs Addressed in this Course: 1, 2, 5, 6
• This is an advanced placement course

AP BC CALCULUS (2459) (UC Approved “c”) Year

Students complete the study of a yearlong college calculus course that was started in Analysis H. The course content includes: functions and limits, derivatives of algebraic functions, the definite and indefinite integral, area, volumes of revolution, differentiation of exponential, logarithmic, trigonometric and inverse trigonometric functions, methods of integration, infinite series, simple differential equations, vectors and applications. A graphing calculator is required for this course. Students may choose to take the Advanced Placement Exam in Calculus BC.

• Prerequisites: Successful completion of Analysis Honors; open to grades 11 and 12
• Homework Expectation: 3 hours per week
• District SLOs Addressed in this Course: 1, 2, 5, 6
• This is an advanced placement course

ELECTIVE COURSES IN MATHEMATICS

APPLIED MATH (2450) (Pending UC Approval) Semester

Students will learn and apply a variety of mathematical methods to analyze and solve problems in business, applied science, engineering, sports, and everyday life. We’ll use math to answer questions like “How could TSA better avoid bottlenecks at airports?”, “How big a mortgage should you take out on your first home?”, and “Should NBA teams shoot more 2 or 3-pointers?”. Emphasis will be on hands-on, project-based learning.

Topics of study include Linear Programming, Decision Trees, Financial Analysis, Queuing, Game Theory, and Applied Statistics.

• Prerequisites: Successful completion of Algebra 2; open to grades 11 and 12
• Homework Expectation: 1 ½ hours per week
• District SLOs Addressed in this Course: 1, 2, 4, 5, 6, 7

AP STATISTICS (2319) (UC Approved “c”) Year

The objective of this course is to provide the students with the equivalent of an introductory college-level statistics course. Course content involves examination of exploratory data analysis, experimental and survey design, the study of random variables (including some probability theory), and inferential statistics for one and two variables. Graphing calculators and computers will be used extensively as an aide to statistical analysis. During second semester, students will also be expected to read excerpts from “The Signal and the Noise” by Nate Silver, and students write a short summary about the connections between the book and the course. Students may choose to take the Advanced Placement Exam in Statistics. There is a group project during each quarter and students should expect to complete some project work outside of class.
- **Prerequisites:** Successful completion of Algebra 2; open to grades 11 and 12
- **Homework Expectation:** 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 5, 6, 7
- This is an advanced placement course and may be taken concurrently with another math class

### BEAM: BUSINESS, ENTREPRENEURSHIP, & MATH (2433B)* (UC Approved “g”) Year

**Blended Learning Course**

The BEAM (Business, Entrepreneurship, and Math) Program strives to create a true public-private partnership by providing high school students the opportunity to connect with local innovation communities, and allowing them to gain real world professional experience. The program is designed to replicate various work environments, including start-ups, company internships, and project mentor programs. During first semester, students develop mock start-ups while learning how mathematics applies to business situations from customized curricula created in partnership with Ernst & Young and PricewaterhouseCoopers. Students will also listen to guest speakers from private sector firms share their expertise and experience. During second semester, students give back to the community by either completing real-life projects through their volunteer work for local small businesses and non-profit organizations, starting their own business, or working as paid interns for local businesses. Students will also receive mentorship from private sector firms and business school alumni.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- **Prerequisite:** Successful completion of an introductory Algebra course; open to grades 10-12
- **Homework Expectation:** 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
- Students may elect to receive CTE credit in lieu of math credit for this course.
DISTRICT REQUIREMENTS

A. California State Physical Fitness Test (required for 9th graders)

B. Students must pass 5 out of 6 of the Physical Fitness Tests by the end of their freshmen year or they are required to enroll in PE as a sophomore. Sophomores, juniors and seniors who have not passed 5 of 6 Fitness Tests must enroll in PE and retake the 6 (six) tests at the beginning and end of the fall semester, and at the end of the spring semester, every year until they have passed 5 of the 6 tests.

C. 2 years of PE are required as a graduation requirement.

NOTE: A Sports Waiver is NOT given for marching band, drill team, rally, color guard, winter guard, or similar activities. A waiver may be granted for varsity, junior varsity and frosh-soph teams at Gunn, including Cheerleading.

9TH GRADE PHYSICAL EDUCATION (2695) (NOT UC Approved)

All freshmen are required to take and complete the first year of physical education. This course is designed specifically for 9th grade students with a focus on dual and individual sports, aquatics and dance. The activities are designed around the State Physical Education Framework and Statewide Standards for PE (HS Course 1).

- Prerequisites: None
- Homework Expectation: Up to 1 hour per week
- District SLOs Addressed in this Course: 1, 2, 5
<table>

---
gymnastic/tumbling, and team activities. The activities are designed around the State Physical Education Framework and Statewide Standards for PE (HS Course 2).

This course is regular 10th Grade PE, but is offered with priority given to student-athletes on Gunn sports teams, to minimize the impact of missing classes due to needed travel for athletic contests.

- **Prerequisites:** Completion of PE 9, or enrolled in grade 10 or higher
- **Homework Expectation:** Up to 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 5

### YOGA & MINDFULNESS (2759)

Students will begin the course by taking an overall assessment of their current emotional and physical fitness as well as set goals for improvement. Students learn a series of yoga postures and philosophy which will help promote strength, flexibility and cardiorespiratory health. Students will begin to appreciate the body, mind, and breath connection and how regular yoga and journaling practice provides balance of these. Course will have adjustable assignments so that students may take the class multiple times. Daily cardiovascular exercise will be included with this class and students may not be on a sports team and receive a prep/study period for this class.

- **Prerequisites:** Successful completion of PE 9
- **Homework Expectation:** Less than 1 hour per week
- **District SLOs Addressed in this Course:** A1, A2, B1, E4
- **CCSS Addressed in this Course:** Effective communication through listening, speaking and writing; Reading with understanding; Critical and creative thinking to solve problems

### ATHLETIC CONDITIONING (2795) (NOT UC Approved)

This course is designed to help the athlete maintain his/her body conditioning, but is open to all students wishing to focus on improving their overall fitness and conditioning. Activities include but are not limited to: strength and endurance training in the weight room, cardiovascular training through running, step aerobics, and aerobic games; i.e., basketball, soccer, flag football, etc.; flexibility training through power stretching and plyometrics. Athletes are encouraged to enroll in Athletic Conditioning.

- **Prerequisites:** Completion of PE 9
- **Homework Expectation:** Up to 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 5

### INDEPENDENT STUDY PHYSICAL EDUCATION (2752) (NOT UC Approved)

The purpose of Independent Study Physical Education is to provide options for students to engage in alternative pathways for which they can receive physical education credit towards graduation. *Freshmen are not eligible* — this is to ensure that all students are exposed to a well-rounded Physical Education curriculum and participate in a series of state-mandated physical performance tests later in ninth grade. This program allows up to one of those years to be taken as Independent Study for students participating in sports not offered at PAUSD high schools. Permission is granted one semester at a time. Continuation in the course for a second semester may be requested by the student and may granted by the instructor at the teacher’s discretion.

**Eligibility requirements are:** (1) The student must have completed and passed 9th grade PE and be a sophomore, (2) the student must have met 5 of 6 fitness standards during 9th grade PE as determined by California Fitness test, (3) the sport/activity is not offered at Gunn, (4) the activity will occur under the supervision of a Supervising Instructor/Coach who has the appropriate training and expertise to provide the level of instruction required for the activity, (5) the student has a minimum of three years prior experience in the activity. Qualifying experience is year-round instruction/training on a 5-6 days per week average, 6) The activity involves skill improvement sessions 5-6 days per week, Student practices/trains a minimum of 15 hours per week under appropriate supervision of a qualified Instructor/Coach.

The application Packet with pages 1-3, 6 and 7 must be returned along with evidence to the Physical Education Instructional Supervisor, before the second Friday of each semester to be eligible.

Further information and the instructional packet can be found here: [http://goo.gl/Eh7rd1](http://goo.gl/Eh7rd1)
ATHLETICS PROGRAM

After-school sports are open to everyone.

Prerequisites:

1. Filled out Athletics Registration:
   https://docs.google.com/a/pausd.org/spreadsheet/viewform?formkey=dHk0TXFkbUNQX0FDWHBGSWU3MHJVGc6MA#gid=0
2. Completed doctor’s physical examination. “Pre-participation Physical Evaluation” form (under Gunn Athletics)

To be eligible, students must have passed 20 units of credit and maintain a minimum grade point average (GPA) of 2.0 in the last grading period. All students, except first semester freshmen enrolled in a PE class, must also be currently passing 20 units of credit. Students enrolled in a PE class may be excused from attending PE while playing for a Gunn Athletic team. To receive a “prep,” students must submit a request form (online from the Gunn PE Web site). The form must be signed by their parents/guardian along with their coach. The student-athlete will receive a grade and credit based on a self-evaluation including a coach’s grade, and must return to PE following the last athletic practice or competition.

</table>
To graduate from high school, students are required to have one year of physical science and one year of life science, both of which fulfill the University of California (UC) laboratory science requirement (known as UC ‘d’). Since the University of California recommends three years of lab science, students are strongly encouraged to take yearlong courses in the core sciences – biology, chemistry, and physics. All Gunn science course offerings fulfill the UC ‘d’ requirement.

While we encourage students to take on healthy challenges in their science course selection, strict policies regarding adding or dropping courses once the semester has begun are enforced. (See page 7 for lane change information.) For this reason, students should carefully consider their course choices. To assist with this process, in each course description, the Science Department has listed course prerequisites, predictors of success, and homework time commitment expectations.

Science Course Offerings

* Bio H does not earn weighted credit with the University of California
† The course description for Biotechnology can be found in the CTE section of the catalog (page 16)
§ Nanotechnology is only offered second semester during H period (after school)
Biology

All biology courses at Gunn High School meet the graduation and university lab science requirements for life science.

First-Year Biology Courses
Freshmen at Gunn High School take a biology course. First-year biology courses will vary in depth of coverage of each topic, degree of independent learning, and amount of homework required. The following table shows predictors for success for freshman biology.

<table>
<thead>
<tr>
<th>Predictor</th>
<th>Biology 1</th>
<th>Biology 1A</th>
<th>Biology H</th>

</table>

Biology 1 (3108)  (UC Approved “d”)  Year
Biology 1A (3115)
Biology 1A SLC (3215)
Biology H (3131)

In all three biology levels (1, 1A, H), topics include cell biology, genetics, evolution, biodiversity, ecology, life processes, reproduction, and contemporary advances and issues in cellular biology and biotechnology. Topics will be developed through laboratory exercises, discussions, lectures, demonstrations, informational research projects, and field trips. Scientific skills and methods will be emphasized.

Biology 1A SLC is the section of Biology 1A that is integrated into the “Small Learning Community” Program. See page 70 for a description of the “Small Learning Community” Program.

Bio H does not earn a weighted grade from the University of California. Please see “Other Honors Course” #3 at: http://www.ucop.edu/agguide/a-g-requirements/honors/index.html for additional information.

- Prerequisites: Open to grade 9
- Homework Expectation: Ranging from 2 to 5 hours uninterrupted time per week depending on level. See “Predictors for Success in Each First-Year Biology Course” chart above.
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6, 7
- This class is a college prep course

Advanced Biology Courses
Each advanced biology course is an upperclassman course (grades 11-12) that requires students to have successfully completed a biology course and a chemistry or other physical science course. The following table shows both prerequisites and predictors of success.
<table>
<thead>
<tr>
<th>Predictor</th>

**AP BIOLOGY (3139) (UC Approved “d”) Year**

This course is designed to provide a survey of biological knowledge at an introductory college level. Because successful completion of the curriculum will enable students to take the College Board Advanced Placement Examination, the course follows the outline recommended by the College Board, covering the general content areas of: (1) Molecular and Cellular Biology; (2) Genetics and Evolution; and (3) Organisms and Populations.

Heavy emphasis is placed on understanding the connection between experimentation and scientific discovery. Both hands-on laboratory activities and scientific readings are used to show how biological information is gained, interpreted, and applied. Required homework includes extensive reading, activities, regular written lab reports, and occasional group projects.

- **Prerequisites:** Open to grades 11 and 12. Successful completion of a biology course. Successful completion of a first-year chemistry course at Gunn High School. (Exceptions must be approved by both the Science Department Instructional Supervisor and the Guidance Department.)
- **Homework Expectation:** 5-8 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

**BIOTECHNOLOGY: THEORY & PRACTICES (3955) (UC Approved “d”) Year**

The course description for Biotechnology can be found in the CTE section of the catalog (page 16).

**MARINE BIOLOGY (3168) (UC Approved “d”) Year**

Marine Biology is a second-year biology course that builds upon and extends biological concepts developed during the first year. Students will take an in-depth look at the features of the ocean and the variety of plant and animal life that lives within. They will investigate how life in the ocean is interconnected and the impact that humans have on that system. Topics will be developed through laboratory exercises, discussions, lectures, demonstrations, informational research projects, and field trips. Please note, this is a laboratory science class where scientific skills and methods (including data analysis and laboratory write-ups) will be emphasized.

- **Prerequisites:** Open to grades 11 and 12. Successful completion of Biology and a physical science course (Conceptual Physics, Astrophysics, Chemistry, Chemistry H, Physics, Physics H)
- **Homework Expectation:** 1 hour uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
## CHEMISTRY

All chemistry courses meet the physical science graduation requirement, and all university lab science admission criteria.

Both first-year chemistry courses cover the same fundamental concepts but differ in the degree of analysis, quantitative understanding and independent thinking required of students.

### PREREQUISITES & PREDICTORS OF SUCCESS FOR CHEMISTRY COURSES

<table>
<thead>
<tr>
<th>Predictor</th>
<th>Chemistry</th>
<th>Chemistry Honors</th>
<th>AP Chemistry</th>
</tr>
</thead>
</table>
| Prerequisite courses and description of math skills required. | Successful completion of a biology course  
A strong understanding of introductory algebra  
Concurrent enrollment in or successful completion of a geometry course strongly recommended | Successful completion of a biology course  
A very strong understanding of introductory algebra, logarithms, and scientific notation  
Concurrent enrollment in or successful completion of a geometry course strongly recommended | Successful completion of Chemistry H or Chemistry.  
A very strong understanding of first year Chemistry. (See course description)  
A very strong knowledge of algebra and a high confidence in problem-solving skills.  
Successful completion of a second-year algebra course (Alg 2 or higher). |
| Degree of independent learning and academic responsibility | Limited guidance needed | Self-motivated; high degree of independence | College-level expectation of independence and collaboration with peers. |
| Commitment to uninterrupted hours of required homework per week (Discretionary out of class study time is not included) | 2-3 hours uninterrupted time per week  
Assigned HW: 1-2 h  
Lab reports: 1 h | 3-4 hours uninterrupted time per week  
Assigned HW: 2 h  
Lab reports: 1-2 h | 3-6 hours uninterrupted time per week |

### CHEMISTRY (3624) *(UC Approved “d”) Year*

Topics covered include atomic structure, nuclear chemistry, chemical nomenclature, periodic properties of elements, bonding, states of matter—gas laws, solutions chemistry, chemical reactions, thermodynamics and kinetics of reactions, chemical equilibrium, and acid-base reactions. *(NOTE: Same topics as Chemistry Honors)*

The course includes many laboratory experiments and demonstrations. Students learn how to work safely in the laboratory, how to perform basic laboratory operations, how to organize and interpret data, and how to draw conclusions from experimental results.

Chemistry is sufficient preparation for students wanting to take AP science courses that require a chemistry course as a prerequisite. Chemistry Honors is not required.

- **Prerequisites:** Open to grades 10, 11 and 12. Successful completion of a first-year biology course or the equivalent. Successful completion of an introductory algebra course, leading to a strong understanding of introductory algebra. Concurrent enrollment in or completion of a geometry course highly recommended. Consent of department required for exceptions.
- **Homework Expectation:** 2-3 hours uninterrupted time per week (assigned homework: 1-2 hours; lab reports: 1 hour)
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
CHEMISTRY HONORS (3625) *(UC Approved “d”)*

Chemistry Honors is not required for students wanting to take AP science courses; Chemistry is sufficient for this purpose.

Chemistry Honors covers all material that is covered in Chemistry, but with more depth and breadth. Topics like quantum mechanics, molecular geometry, thermodynamics, kinetics, dynamic equilibrium and electrochemistry are covered in further detail.

Students should take Chemistry Honors if they have a strong interest in the sciences, prefer a high level of rigor in their studies, and are able to accommodate their schedules for a much more significant time commitment than Chemistry would entail.

- **Prerequisites:** Open to grades 10, 11 and 12. Successful completion of a first-year biology course or the equivalent. Successful completion of an introductory algebra course, leading to a very strong understanding of introductory algebra, including logarithms and scientific notation. Concurrent enrollment in a geometry class or completion of geometry highly recommended.
- **Homework Expectation:** 3-4 hours uninterrupted time per week (assigned homework: 2 hours; lab reports: 1-2 hours)
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

AP CHEMISTRY (3609) *(UC Approved “d”)*

This course will prepare students to take the AP Chemistry examination.

Life is Chemistry! In general chemistry, much of what we learn is foundational, but this will not be your typical lecture based chemistry course. The educational philosophy behind the course lies in hands on learning, and inquiry, which will challenge all types of learners. Therefore students will be spending at least 40% of their time on laboratory work, some of which may need to be completed outside of class. The expectations for this class is to have second year chemistry students who are excited about learning chemistry, love being in lab, and are willing to work through challenges.

**IMPORTANT NOTE:** The AP Chemistry course is taught through lab performance and analysis. Students are required to utilize the knowledge taught in their first-year chemistry course, as that material will not be retaught.

- **Prerequisites:** Open to grades 11 and 12. Successful completion of Chemistry OR Chemistry H and a very strong understanding of first-year chemistry. Successful completion of a second-year algebra course (Alg 2 or higher). Students need a strong knowledge of Algebra 2 and a high confidence in problem-solving skills.
- **Homework Expectation:** 3 to 6 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
PHYSICS

All physics courses meet the physical science graduation requirement, and all university lab science admission criteria.

Physics Courses

All physics courses cover mechanics and electromagnetism. With the exception of AP Physics C, physics courses may also include other topics, such as optics, waves, and modern physics. Additional emphasis may be placed on thermodynamics, astronomy, and other physics-related or interdisciplinary topics at the discretion of the instructor. Each course develops basic physics concepts and explores applications to daily life.

**CONCEPTUAL PHYSICS (3254)** (UC Approved “d”) Year

Conceptual Physics is intended to meet the needs of those students who are still developing their basic algebraic skills in a first-year algebra course. It provides a rudimentary introduction to the fundamental principles of physics and how they apply to our daily lives. Topics covered include motion, forces, energy, waves, optics, electricity, and magnetism. Primary emphasis is placed on developing a conceptual understanding of topics, though simple mathematical formulas will be introduced and used to augment their understanding of how nature works. In such cases, use of these formulas will support the development of algebraic skills and provide reinforcement for material covered in introductory algebra courses.

- **Prerequisites:** Open to grades 10, 11 and 12. Successful completion of a biology course. Successful completion of 1 year of algebra. Consent of department required for exceptions. Concurrent enrollment in or completion of a geometry course highly recommended. Consent of department required for exceptions.
- **Homework Expectation:** 1 hour uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
PHYSICS (3820) (UC Approved “d”) Year

The goal of Physics is to develop a conceptual and algebra-based understanding of the fundamental principles of physics. Students will explore these concepts in the laboratory and will apply them in problem-solving situations and to explain physical phenomena in their daily lives. Students should be confident with the knowledge and application of introductory algebra.

- **Prerequisites:** Open to grades 10, 11 and 12. Successful completion of Biology. A very strong understanding of introductory algebra. Concurrent enrollment in geometry or higher level math.
- **Homework Expectation:** 1 to 2 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

AP PHYSICS 1 (3824) (UC Approved “d”) Year

The course is designed to foster deeper conceptual understanding of physics topics through inquiry, quantitative data analysis, and problem-solving. The course will teach students to relate conceptual and pictorial understanding to mathematical descriptions used in the practice of physics. Students will engage in scientific questioning and evidence-based reasoning to guide their understanding of the content.

This course will also prepare students to take the AP Physics 1 exam.

- **Prerequisites:** Open to grades 11 and 12. Successful completion of any Biology course. Chemistry course recommended. Very strong knowledge of Algebra 2 and Trigonometry and a high confidence in problem-solving skills. Concurrent enrollment or successful completion of IAC, Analysis Honors, or Calculus.
- **Homework Expectation:** 2 to 4 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

AP PHYSICS C (3879) (UC Approved “d”) Year

AP Physics C is an advanced physics course, taught with calculus, equivalent to a course taken by physics majors and engineers at most universities. It concentrates on Mechanics and Electricity and Magnetism, two semesters of the usual college curriculum. Students with particular strengths in math and science, and students with a serious intent to major in science or engineering should consider this course. The course prepares students to take the Advanced Placement physics examinations in Mechanics and/or Electricity and Magnetism.

- **Prerequisites:** Open to grades 11 and 12. Concurrent enrollment or completion of a calculus course and a high confidence in problem-solving skills. Successful completion of any biology course. Chemistry course recommended. Physics course recommended.
- **Homework Expectation:** 4 to 7 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

**ASTROPHYSICS (6409)** *(UC Approved “d”)*

This course meets all graduation and university admission criteria for physical science.

This course is a hands-on, inquiry based laboratory course that will introduce students to concepts in Astronomy while exploring the fundamental principles that govern the physical universe. The course will emphasize the processes of science including observation and experimentation, gathering and evaluating data, interpreting scientific data, searching for patterns, developing and interpreting models, making conclusions based on evidence, and communication of scientific process, ideas and conclusions. The course will highlight the historical development of scientific thinking, cumulative nature of scientific evidence and the evolution of our current understanding of the physical universe. The topics covered in this course include, the scientific process, celestial motions, history of Astronomy, planetary mechanics, the nature of light, telescopes, survey of the solar system, detail study of our Moon and Mars, our Sun as a star, properties of stars, stellar evolution, galaxies and cosmology.

- **Prerequisites:** Open to grades 10, 11 and 12. Successful completion of a biology course; successful completion of one year of algebra
- **Homework Expectation:** 1 hour uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

**AP ENVIRONMENTAL SCIENCE (3279B)** *

*(UC Approved “d”)*

*Blended Learning Course*

AP Environmental Science is structured to provide a survey of earth’s geology and history, its environmental processes, disturbances to these processes, impact of human population on the environment and governmental regulation of local and international environmental issues.

The course follows the outline recommended by the College Board and is designed to enable students to successfully take the College Board Advanced Placement Examination.

Course content, laboratory activities, textbook assignments, activities and projects will all be carried through with the skill and content required to be successful on the AP exam.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.*

- **Prerequisites:** Successful completion of a biology course. Successful completion of a first-year chemistry course at Gunn High School. (Exceptions must be approved by both the Science Department Instructional Supervisor and the Guidance Department.)
- **Homework Expectation:** 3 to 5 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
NANOTECHNOLOGY 10 (3835)  (UC Approved “g”)  Semester

Since this is a college-level course, this course will introduce upper-division high school students to the key ideas of nanoscale science with an emphasis on applications of topics from physics, biology, chemistry, mathematics, and environmental science. Key concepts will be explored in an integrated discussion-lab setting as opposed to a strict lecture-based format. These concepts will include exploring the myths and realities of nanotechnology, self-assembly, nanomagnets, scanning probe microscopy, nano-engineered fabrics and memory wires, biomimicry, and nanomedicine. This is a dual enrollment course offered by Foothill College and gives students 10 high school credits. Students will also receive college credit through Foothill College which is UC/CSU transferable.

This course will be offered “H” period.

- **Prerequisites:** Open to grades 11 and 12. Successful completion of Biology and Chemistry
- **Homework Expectation:** 3 hours uninterrupted time per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
The Visual and Performing Arts Department at Gunn High School, in keeping with the UC and CSU entry requirement for Visual and Performing Arts, offers a yearlong sequential curriculum in all department courses. (Only yearlong courses are accepted as fulfillment of the entry requirement). We do not offer semester courses and students should therefore not be enrolled by semester.

Please note that the amount of work expected outside class in Art depends on the student’s pace, attendance, and effective use of class time.

**ART**

<table>
<thead>
<tr>
<th>ART SPECTRUM (6205)</th>
<th>(UC Approved “I”)</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>This foundation course is designed to meet the challenge of creating visual art in a compelling and interesting way. Through 2-D and 3-D experiences the curriculum will provide each artist with the ability to generate creative ideas as well as the skills to execute them. Since learning to create visual art involves learning to see, Art Spectrum focuses on the development of this essential visual skill. Observational and conceptual exercises will explore the use of a broad variety of materials, techniques, and treatments used to design, draw, paint, and sculpt. Exposure to art in our community, peer support, and the development of personal sketchbooks will build confidence to create. This course inspires and encourages a positive feeling about the visual arts, and knowledge of the basic techniques and procedures to experience and understand art.</td>

<th>DRAWING/PAINTING (6340)</th>
<th>(UC Approved “I”)</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drawing is the foundation of all artists to describe their ideas, regardless of the medium of the final product. This course will prepare any student to draw well by enhancing their ability to see subtle value ranges, create a full range of bold values, understand relationships of space and learn what makes a strong composition. This course can be repeated for two years with credit.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Designed as the first course in the Drawing and Painting Program, the curriculum gradually builds upon itself to move from an exploration in expressive mark making with graphite, conté, charcoal, colored pencil and pastel, to a painting experience. Drawing well is the foundation for painting well, thus it is after drawing that advanced color theory, painting approaches and brush techniques are considered through acrylic and watercolor paint. Assignments are designed to build the “artist’s tool belt”– the technical and expressive skills to render a broad range of surface qualities or textures upon the illusion of forms, in both black and white and color. The lessons encourage creative, imaginative thinking to begin visually communicating personal concepts. Historical and cross-cultural views on art is integrated into lessons and discussions; sketchbooks are highly used; and exposure to local artwork is obligatory. Representatives will be invited to present, from private Art Colleges and UCs with strong art programs, about options for art careers.</td>

</table>
ADVANCED DRAWING & PAINTING I (6344) (UC Approved “f”) Year

Designed sequentially as the second course in the Drawing and Painting Program, Advanced Drawing & Painting I is an expansion of the drawing and painting experience. This course develops the artist’s expression to communicate visually and find personal meaning in student work. While building technical and expressive skills in advanced media such as Intaglio printmaking, oil painting and mixed media, the creation of concept-driven work will be achievable. Through advanced understanding and use of design elements and principles, the beginning of a high quality body of work will be developed in preparation for college and personal portfolios.

Students will support one another’s artistic process through peer assessment, build articulation of conceptual meaning by using advanced art vocabulary in critiques, and create a positive studio environment. This course is for mature artists who have a strong foundation in the use of multiple media, are serious about making art and have responsible studio behavior.

Assignments will gradually be less structured, allowing for personal motivation towards artistic independence. Sketchbooks become an essential part of documenting growth, and semester museum visits and reports offer important exposure to new art and artists. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.

This course can be used to fulfill a year of Career Tech Education (CTE) credit and can be repeated an additional year for Elective (non-CTE) credit.

- **Prerequisites:** Successful completion of one full year of Drawing/Painting; grades 10-12
- **Homework Expectation:** 2 hours per week on average
- **Offered together with** Advanced Painting & Drawing I
- **District SLOs Addressed in this Course:** 1, 4, 6
- **May also satisfy the CTE graduation requirement**

ADVANCED DRAWING & PAINTING HONORS (6339) (UC Approved “f”) Year

Designed sequentially as the second course in the Drawing and Painting Program, Advanced Drawing and Painting Honors is an expansion of the drawing and painting experience and gives Honors credits. This course develops the artist’s expression to communicate visually and find personal meaning in student work. While building technical and expressive skills in advanced media such as Intaglio printmaking, oil painting and mixed media, the creation of concept-driven work will be achievable. Through advanced understanding and use of design elements and principles, the beginning of a high quality body of work will be developed in preparation for college and personal portfolios. Overall, it is a “Portfolio Preparation” course meant to build and refine 2-D work for a college portfolio, an AP Studio Art Portfolio, or for personal interest.

Students will support one another’s artistic process through peer assessment, build articulation of conceptual meaning by using advanced art vocabulary in critiques, and create a positive studio environment. This course is for mature artists who have a strong foundation in the use of multiple media, are serious about making art and have responsible studio behavior.

Assignments will gradually be less structured, allowing for personal motivation towards artistic independence. The Honors section will involve regular sketchbook work and some written analysis. Sketchbooks become an essential part of documenting growth, and semester museum visits and reports offer important exposure to new art and artists. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.

This course can be used to fulfill a year of Career Tech Education (CTE) credit and can be repeated an additional year for Elective (non-CTE) credit.

- **Prerequisites:** Successful completion of one full year of Drawing/Painting; grades 10-12
- **Homework Expectation:** 2 hours per week on average
- **Offered together with** Advanced Painting & Drawing I
- **District SLOs Addressed in this Course:** 1, 4, 6
- **May also satisfy the CTE graduation requirement**
ADVANCED DRAWING & PAINTING II (6349B)*

BLENDED LEARNING COURSE

(UC Approved “I”)  Year

Designed as the third course in the Drawing and Painting Program, this course has a Self-Directed curriculum. Thus, quarterly contracts will be based on student-designed learning objectives and aesthetic intent, with a minimum of three pieces of artwork per quarter. Portfolio development will be supported through quarterly one-on-one consultations and class critiques.

This advanced course is in the same period as AP Studio Art, and is for students who choose to opt out of AP Studio Art, but desire artistic independence and full studio access. Sketchbooks continue to be an essential part of documenting personal and artistic growth, and semester museum visits and reports offer important exposure to art trends and concepts.

Participation in photo shoots is available to digitally document work for college or personal portfolios. Students have the opportunity to curate and exhibit their body of work. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: Successful completion of one full year of Advanced Drawing/Painting; grades 11-12
- Homework Expectation: 2 hours per week on average
- District SLOs Addressed in this Course: 1, 4, 6

AP STUDIO ART – DRAWING (6459B)*

BLENDED LEARNING COURSE

(UC Approved “I”)  Year

The AP Studio Art Drawing and Painting Portfolio consists of: artwork involving drawing, painting, printmaking, and mixed media. Advanced Drawing & Painting II and AP Studio Art students are in the same period, and both courses will be together for critiques twice a year.

Students who enroll in this college-level course must first successfully complete a review of their current portfolio with the Drawing and Painting instructor for assessment, ideally by the end of the previous year. If the quantity and quality in the body of work reflects the necessary preparation, or summer plans indicate productive art making or instruction, then there is acceptance to proceed.

Approximately 30 completed pieces reflecting first-year, college-level standards are required in the portfolio by the first week of May, and should exhibit these areas of concern: Quality, Concentration and Breadth. Photo shoots are scheduled as a service to digitally document artwork for digital submission of Concentration and Breadth. Five actual pieces for the Quality portion are mailed in a portfolio to the AP College Board, to be returned.

Quarterly, one-on-one reviews are scheduled with instructor to monitor progress, guide the artistic process and evaluate conceptual development and mastery of drawing and painting. To maintain a position in this course, evidence of roughly four pieces per quarter is upheld and a contract of commitment and responsible studio behavior is signed. The AP College Board will assign college credit for this course after their review in summer, upon receiving a score of 3 or higher and completion of their form.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: Successful completion of one full year of at least one Advanced course within that discipline and approval of instructor
- Homework Expectation: The homework will depend greatly on how many art pieces the student brings to the AP course from their portfolio. It is recommended that students have at least nine completed pieces for the breadth portion, prior to admission. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.
- District SLOs Addressed in this Course: 1, 4, 6
### GRAPHIC DESIGN (6262)  
(UC Approved “f”)  

This class fulfills the district Career Technical Education requirement. This is an introductory course involving studio inquiry into the nature of graphic design and visual problem-solving. Topics introduced in the course are: symbols, typography, information design, visual concepts, and three-dimensional graphic design. Emphasis is placed on the basic art elements and principles that underlie all great designs – the tools and techniques needed to effectively translate visual ideas, execute the concept, and construct a design, in order to develop an understanding of how form and message create a visual language. The course also introduces the student to studio operations and procedures including traditional and digital media, client-designer relations, production processes for print media, graphic design history and cultural content, as well as written and oral components of classwork. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process. This course is open to grades 10-12.

- **Prerequisites:** Art Spectrum or equivalent
- **Homework Expectation:** 1 hour per week on average
- **District SLOs Addressed in this Course:** 1, 6, 7

### ADVANCED GRAPHIC DESIGN (6274)  
(UC Approved “f”)  

The primary goal of this course is to develop an advanced understanding of the methods and concepts employed in solving communications problems in graphic and package design. This course also serves to prepare a portfolio of fundamental and dependable methods for creating meaningful, imaginative, communication solutions through research, analysis, oral and written investigation of communication tasks and their target audiences. Traditional and digital media are utilized, as well as demonstrations, presentations, group exercises, historical and cultural research, class critiques, and one-on-one meetings with students.

Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process. This course is open to grades 11-12.

- **Prerequisites:** Successful completion of one full year of Graphic Design I and approval of instructor. This class fulfills the district Career Technical Education requirement.
- **Homework Expectation:** 2 hours per week on average
- **District SLOs Addressed in this Course:** 1, 6, 7

### GRAPHIC PUBLICATIONS (YEARBOOK) (6167)  
(NOT UC Approved)  

Positions on the graphic production/yearbook staff are awarded through an application-interview process, which occurs between January and February and is announced in the school bulletin. Priority will go to students with prior photography, computer, graphic design, or past yearbook experience. Instructor and editor approval is required in all cases. The graphic production/staff produces the school yearbook; thus, staff members must have the necessary skills. Instruction in computer graphic, layout, design, and copy preparation will be provided during the first quarter. Those applying for a photography position must have successfully completed a beginning photography course and will be required to learn studio lighting for portraiture. All students are required to spend time in addition to class hours working on the book, and editorships are awarded to the most qualified students who have served on the yearbook staff. This course is open to grades 10-12.

- **Prerequisites:** Suggested completion of the Graphic Design and Photography courses
- **Homework Expectation:** See course description
- **District SLOs Addressed in this Course:** 1, 6, 7

### CERAMICS (6258)  
(UC Approved “f”)  

A basic course in ceramics designed for students who have an interest in making functional as well as sculptural pieces using a variety of construction methods including both hand built and wheel thrown processes. Students will learn how to use glaze and other alternative methods for decorating and finishing their work. Emphasis on developing proficiency with building and glazing processes is stressed and projects are designed to build students' creative problem-solving skills. Design, aesthetics and planning are an integral part of the curriculum. Students will be required to keep an active sketchbook where they sketch their concepts and design their works before construction. The ceramics curriculum analyzes historical, cultural and aesthetic aspects of clay working and creative problem-solving.
As a result of taking this course, students will be able to create works of art that reflect an understanding of the elements of art and the principles of design. They will be able to appreciate and discuss the artistic accomplishments of various cultures, past and present, using visual art’s vocabulary. Critiques and museum/gallery visits are an expected part of the curriculum. This course is open to grades 10-12.

- **Prerequisites:** Art Spectrum or equivalent, or teacher approval
- **Homework Expectation:** See course description
- **District SLOs Addressed in this Course:** 1, 4, 6

### ADVANCED CERAMICS 1 (6277)  
(UC Approved “f”)  Year

Advanced Ceramics I is the second course in the Ceramics Program and is designed to build upon the foundational skills taught in Beginning Ceramics. The course is designed to develop student voice in their created work and covers a variety of more advanced techniques both in sculpture and on the potter’s wheel. Students are expected to become proficient designers and planners—students will have more freedom to develop their own ideas and develop skills in a particular area. Sketchbooks are required in which students will take notes, collect research and sketch designs prior to construction.

Students are expected to participate in critiques and will have opportunities to exhibit their work in the library and in the community. Advanced Ceramics I is the prerequisite for Advanced Ceramics II and AP Studio Art 3D. Opportunities to photograph student work will occur throughout the year in order to build a digital portfolio.

This course is open to grades 11-12.

- **Prerequisites:** Successful completion of one full year of Ceramics or approval of the instructor
- **Homework Expectation:** Less than 1 hour per week depending on the particular project, degree of involvement and point in the curriculum
- **District SLOs Addressed in this Course:** 1, 4, 6
- **May also satisfy the CTE graduation requirement**

### ADVANCED CERAMICS 2 (6279)  
(UC Approved “f”)  Year

Designed as the third course in the Ceramics Program, Advanced Ceramics II is designed to expand upon students’ interests in working with clay. The course is self-directed and is therefore geared for the student who is motivated to undertake ambitious work in clay. Students must get projects preapproved by the instructor and a minimum of four projects per semester is required.

The goal for this course is to provide the advanced student the opportunity to grow in a setting with ambitious peers and to produce works toward a sophisticated portfolio. Students will explain or justify themes and aesthetic decisions, and make connections to art history and culture.

Sketchbooks are required in which students will take notes, collect research and sketch designs prior to construction. Students will have the opportunity to exhibit their work in the library and in the community. Photography of student work will occur throughout the year in order to build a digital portfolio.

- **Prerequisites:** Successful completion of one full year of Advanced Ceramics I or the approval of the instructor
- **Homework Expectation:** Less than 1 hour per week depending on the particular project, degree of involvement and point in the curriculum
- **District SLOs Addressed in this Course:** 1, 4, 6

### AP STUDIO ART 3-D DESIGN (6449)  
(UC Approved “f”)  Year

The AP Studio Art 3-D Design Portfolio consists of: artwork involving pottery, sculpture and mixed media.

Students who enroll in this college-level course must first successfully complete a review of their current portfolio with the ceramics sculpture instructor for assessment, ideally by the end of the previous year. If the quantity and quality in the body of work reflects the necessary preparation, or summer plans indicate productive art making or instruction, then there is acceptance to proceed.

Approximately 22 completed pieces reflecting first-year, college-level standards are required in the portfolio by the first week of May, and should exhibit these areas of concern: Quality, Concentration and Breadth. Photo shoots are scheduled as a service to digitally document artwork for digital submission.
Quarterly, one-on-one reviews are scheduled with instructor to monitor progress, guide the artistic process and evaluate conceptual development and mastery of sculpture and pottery. To maintain a position in this course, evidence of roughly four pieces per quarter is upheld and a contract of commitment and responsible studio behavior is signed. The AP College Board will assign college credit for this course after their review in summer, upon receiving a score of 3 or higher and completion of their form.

- **Prerequisites:** Successful completion of one full year of at least one Advanced course within that discipline and approval of instructor
- **Homework Expectation:** The homework will depend greatly on how many art pieces the student brings to the AP course from their portfolio. It is recommended that students have at least nine completed pieces for the breadth portion, prior to admission. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.
- **District SLOs Addressed in this Course:** 1, 4, 6

**PHOTOGRAPHY I (6150)** *(UC Approved “f”) Year*

Students learn film and DSLR camera operation, digital workflow, composition and design principles, introductory image editing and management in Adobe software (Photoshop and Lightroom), related terminology and techniques, and matting/presentation of finished work. Other assignments may include pinhole camera, portraiture, use and selection of lenses, and traditional darkroom techniques. The curriculum will provide learning experiences which include the historical and interdisciplinary aspects of photography, taught through the use of slides, videos and student presentations.

Students will gain confidence in their abilities to create original compositions. Successful work will need to demonstrate technical proficiency and creative expression. Through writing, research and discussions, students will demonstrate aesthetic perception, evaluation and an understanding of historical and cultural aspects of the medium. Students may be assigned a museum or gallery visit in Palo Alto. This course is open to grades 10-12.

- **Prerequisites:** None
- **Homework Expectation:** On average, 1 hour per week
- **District SLOs Addressed in this Course:** 1, 6, 7

**ADVANCED PHOTOGRAPHY (6158)** *(UC Approved “f”) Year*

Advanced Photography builds on skills taught in Photo I. This course fulfills the district Career Technical Education requirement. Assignments will emphasize the technical as well as emotional and communicative nature of the photographic medium. Students will master advanced skills in composition, in the use of 35 mm and medium format film cameras, and will practice portable or studio lighting techniques. Students will expand their knowledge of darkroom and digital processes to include contrast control, filters, dodging and burning, advanced film exposure and developing methods. They will also explore one or more alternative photo processes (such as multiple exposures, cyanotype, solarization and photograms).

Students who successfully complete this course will be able to demonstrate an understanding of current and historical directions in photography through completed works, written reviews of exhibits and class critiques. Students will have the opportunity to take field trips outside of Palo Alto, where they will visit galleries and practice street photography or nature photography. During the second semester, students will develop an independent project and start a blog that features their work. They will also be introduced to online book publishing and have the opportunity to create their own photo book.

This course may be repeated for credit upon instructor recommendation. Third year students will select a theme that they pursue independently, along with regular meetings for feedback from the instructor. Students can use this 3rd year to build a solid portfolio with which to apply to college art programs. Students may take an Honors version of this course (see description course #4917). Advanced Photography is required in order to take the AP Studio Art 2-D Design course.

Seniors in Advanced Photo have the opportunity to curate and exhibit their work in the Library Gallery through a sign-up process. This course is open to grades 10-12.

- **Prerequisites:** Successful completion Photography 1 or instructor approval
- **Homework Expectation:** On average 1 hour per week
- **District SLOs Addressed in this Course:** 1, 6, 7
- **This course fulfills the district Career Technical Education requirement**
Advanced Photography Honors builds on skills taught in Photo I. Assignments will emphasize the technical as well as emotional and communicative nature of the photographic medium. Students will master advanced skills in composition, in the use of 35 mm and medium format film cameras, and will practice portable or studio lighting techniques. Students will expand their knowledge of darkroom and digital processes to include contrast control, filters, dodging and burning, advanced film exposure and developing methods. During the second semester, students will develop an independent project and start a blog that features their work. They will also be introduced to online book publishing and have the opportunity to create their own photo book. This course may be repeated for credit upon instructor recommendation.

Honors students will have additional assignments (written and project-based) beyond those in Advanced Photo, and will select a theme that they pursue independently throughout the year, along with regular meetings for feedback from the instructor. Advanced Photography Honors will prepare students interested in taking the AP Studio Art 2-D Design course. Seniors in Advanced Photo Honors have the opportunity to curate and exhibit their work in the Library Gallery through a sign-up process. Students may be assigned a museum or gallery visit in Palo Alto. This course is open to grades 10-12.

- **Prerequisites:** Successful completion Photography 1 and instructor recommendation
- **Homework Expectation:** On average 1 hour per week
- **District SLOs Addressed in this Course:** 1, 6, 7
- This course will also fulfill the district Career Technical Education requirement

The AP Studio Art 2-D Design portfolio can include any 2-D media: photography, mixed media, drawing, painting, printmaking, graphic design, digital arts, product design and jewelry making. Students can choose to focus their portfolio specifically towards Photography or Graphic Design or Drawing/Painting.

Students who enroll in this college-level course must first successfully complete a review of their current portfolio with the 2-D Studio Art instructor for assessment, ideally by the end of the previous year. If the quantity and quality in the body of work reflects the necessary preparation, or summer plans indicate productive art making or instruction, then there is acceptance to proceed.

Approximately 30 completed pieces reflecting first-year, college-level standards are required in the portfolio by the first week of May, and should exhibit these areas of concern: Quality, Concentration and Breadth. Five actual pieces for the Quality portion are mailed in a portfolio to the AP College Board, to be returned.

Quarterly, one-on-one reviews are scheduled with instructor to monitor progress, guide the artistic process and evaluate conceptual development and mastery of the chosen discipline. To maintain a position in this course, evidence of progress per quarter is upheld and a contract of commitment and responsible studio behavior is signed. The AP College Board will assign college credit for this course after their review in summer, upon receiving a score of 3 or higher and completion of their form. Seniors have the option to curate and exhibit their body of work in the Library Gallery through a sign-up process.

- **Prerequisites:** Admission may be granted to juniors or seniors who have successfully completed advanced courses in photography, graphic design and/or drawing and painting; grades 11-12
- **Homework Expectation:** The homework will depend greatly on how many art pieces the student brings to the AP course from their portfolio. It is recommended that students have at least seven to nine completed pieces for the breadth portion, prior to admission.
- **District SLOs Addressed in this Course:** 1, 4, 6
**ART HISTORY (6241) (UC Approved “f”)  Semester 1**

This course surveys the great masters and trends of the history of art, together with an examination of art as a reflection of other historical events. We explore Western art from prehistory through the present, including themes such as: war/power, colonization, landscape, mythology and religion, representations of the human body, use of text and technology. The arts of non-Western cultures are included throughout the year for appreciation of their unique qualities. This includes Oceanic, African, Native American Indian and Asian arts. Class activities include films, slides, museum field trips, lectures and related reading and research.

Students who successfully complete this course will need to demonstrate an understanding of Art History chronology, and how different cultures have aesthetically perceived artistic expressions. They will also need to show expanded ability to make aesthetic judgments about content, techniques, forms, and purposes of art, as seen throughout history. Students may be assigned museum visits outside of class. This course is offered in grades 10-12.

This course can be taken for AP credit through enrollment for the full year and completion of all additional AP course work. See the course description for AP Art History for details. One semester of this course will fulfill the Social Studies elective requirement for graduation.

- **Prerequisites:** None
- **Homework Expectation:** On average, 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

**ART HISTORY (6242) (UC Approved “f”)  Semester 2**

**AP ART HISTORY (6249) (UC Approved “f”)  Year**

This course surveys the great masters and trends of the history of art, together with an examination of art as a reflection of other historical events. We explore Western art from prehistory through the present, including themes such as: war/power, colonization, landscape, mythology and religion, representations of the human body, use of text and technology. The arts of non-Western cultures are included throughout the year for appreciation of their unique qualities. This includes Oceanic, African, Native American Indian and Asian arts. Class activities include films, slides, museum field trips, lectures and related reading and research.

Students who successfully complete this course will need to demonstrate an understanding of Art History chronology, and how different cultures have aesthetically perceived artistic expressions. They will also need to show expanded ability to make aesthetic judgments about content, techniques, forms, and purposes of art, as seen throughout history. For AP credit, students will need to take expanded notes on the readings in our textbooks, and practice essay writing. Students may be assigned museum visits outside of class. This course is offered in grades 10-12. One semester of this course will fulfill the Social Studies elective requirement for graduation.

- **Prerequisites:** None
- **Homework Expectation:** 3 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

**INSTRUMENTAL MUSIC**

**CONCERT BAND (7010) (UC Approved “f”)  Year**

The Concert Band is an intermediate/advanced ensemble open to students with an instrumental background who wish to be a part of a quality performing group. There will be a strong emphasis on instrumental techniques and music fundamentals taught through performance. As a result of participation in this class, the student will be ready to audition for more advanced ensembles.

The Concert Band is an ensemble committed to a high level of study and performance of standard and contemporary large band repertoire. This ensemble provides the students with the opportunity to study and perform outstanding band literature from the renaissance to the present.

Attendance at all performances is mandatory. Performance opportunities include fall, winter and spring concerts, CMEA Band Festival, solo/ensembles, feeder school concerts. There are also opportunities for individuals to audition for other ensembles: Jazz Bands, All-State Honor Band, and the Santa Clara County Honor Band. This course is open to grade 9 students only.
- **Prerequisites:** At least one year of instruction on a band instrument, and at least two years’ experience in your middle school band program. If you do not meet this requirement, you must audition for the directors. **If you were not part of your 8th grade band you must audition.** Please contact one of our band directors to set up an audition.
- **Homework Expectation:** 90-120 minutes per week outside of class practice. Both performance and written assessments will be included in the curriculum.
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

### SYMPHONIC BAND (7013) (UC Approved “f”) Year

The Symphonic Band is an advanced ensemble open to students with a strong instrumental background who wish to be part of a quality performing group. There will be a strong emphasis on performance techniques and developing a repertoire of the finest literature for performances. As a result of this experience, the student will be able to better express themselves creatively, and they will have a knowledge and appreciation of music history. Both performance and written assessments will be included in the curriculum.

The Symphonic Band is an ensemble committed to a high level of study and performances of standard and contemporary large band repertoire. This ensemble provides the students with the opportunity to study and perform outstanding band literature from the renaissance to the present.

Attendance at all performances is mandatory. Performance opportunities include fall, winter and spring concerts, CMEA Band Festival, solo/ensemble, feeder school concerts, and graduation. There are also opportunities for individuals to audition for other ensembles: Jazz Band, All-State Honor Band, and the Santa Clara County Honor Band. This course is available for Career Technical Education credit to students in grades 11-12 with teacher approval.

- **Prerequisites:** At least two years of instruction on a band instrument and at least one year in Concert Band at Gunn High School. If you are entering Gunn from outside PAUSD schools you must audition for the directors. Please contact one of our band directors to set up an audition. Grades 10-11-12
- **Homework Expectation:** 90-120 minutes per week outside of class practice. Both performance and written assessments will be included in the curriculum.
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

### WIND ENSEMBLE (6455) (UC Approved “f”) Year

The Wind Ensemble is a highly advanced and select ensemble open to students with an extensive background in instrumental music performance. This ensemble will focus on the performance techniques and knowledge of repertoire associated with the finest in band and wind literature. All of the selected works, concepts learned, and techniques developed, will adequately prepare students to participate in collegiate level musical ensembles. There is opportunity for all students in this ensemble to participate in small chamber music ensembles. Performance assessment, written assessment and self-assessment will be integral parts of the curriculum. Attendance at all performances is mandatory. Performance opportunities include Fall, Winter, and Spring concerts, California Music Educators Association Festivals, Solo-Ensemble festivals, feeder school concerts, regional and national tours, community events, and graduation. There are also opportunities for students to audition to participate in select ensembles such as the Jazz Band, the Santa Clara County Honor Band, the California Band Directors Association All-State Honor Band, and the California Music Educators Association All-State Honor Band.

- **Prerequisites:** Teacher approval and/or audition required. Auditions for Wind Ensemble are held in the spring each year for the following year. At least three years of instruction on a band instrument, and at least one year performing in a Gunn Large Ensemble the prior year. If you are entering from outside PAUSD, you must have performed in your school band for a year: Grades 10-11-12.
- **Homework Expectation:** 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

### JAZZ ENSEMBLE (7022) (UC Approved “f”) Year

The Jazz Ensemble course will focus on the performance techniques and knowledge of repertoire associated with the finest in jazz band literature. Emphasis is placed on the preparation for the performances and evaluation at concerts and various jazz festivals throughout the year. Students will perform music from the international jazz heritage,
drawing from, but not limited to, the following styles: blues, swing, be-bop, ballads, bossa nova, samba, funk and jazz rock. Performance assessment, written assessment and self-assessment will be integral parts of the curriculum.

Students will also study and practice jazz improvisation, using music theory and guided listening as tools to an exploration and development of improvising skills. Attendance at all performances is mandatory.

Performance opportunities include Winter and Spring Concerts, guest artist concert (featuring jazz professionals as guest soloist), various Jazz Festivals and various local concerts in other schools or the community.

- **Prerequisites:** At least 3 years of instruction on a jazz band instrument and at least 2 years of performing in an ensemble. Student must be a member of the Band or Orchestra. Teacher approval and/or audition required.
- **Homework Expectation:** 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

---

**JAZZ B (7017)**

The Jazz B course will focus on the performance techniques and knowledge of repertoire associated with the finest in jazz band literature. Emphasis is placed on the preparation for the performances and evaluation at concerts and various jazz festivals throughout the year. Students will perform music from the international jazz heritage, drawing from, but not limited to, the following styles: blues, swing, be-bop, ballads, bossa nova, samba, funk and jazz rock. Performance assessment, written assessment and self-assessment will be integral parts of the curriculum. Students will also study and practice jazz improvisation, using music theory and guided listening as tools to an exploration and development of improvising skills. Attendance at all performances is mandatory. Performance opportunities include Winter and Spring Concerts, guest artist concert (featuring jazz professionals as guest soloist), various Jazz Festivals and various local concerts in other schools or the community.

- **Prerequisites:** At least 3 years of instruction on a jazz band instrument and at least 2 years of performing in an ensemble. Student must be a member of the Band or Orchestra. Teacher approval and/or audition required.
- **Homework Expectation:** 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 4, 6

---

**ORCHESTRA (7030)**

Orchestra will focus on string techniques, knowledge of a broad representation of different string and orchestral repertoire, as well as the promotion of lifelong learning attitudes about ALL music. Students will perform music drawn from the Renaissance to the present. While performance will be an integral part of the end product, the ongoing process of rehearsing quality music at a high level of musicianship will be the daily challenge. Performance assessment, written assessment, opportunity to participate in Chamber Ensembles will also be a part of the regular orchestra curriculum. Attendance at all performances is mandatory, including Fall, Winter and Spring concerts, district festivals, California Music Educators association festivals, Solo-Ensemble festivals, feeder school concerts, regional and national tours and community events. There are also opportunities for individuals to audition for the All-State Honor String and Symphony Orchestra.

- **Prerequisites:**
  - **For Entering Freshmen:** At least one year of instruction on your instrument and at least two years’ experience in your middle school orchestra program. If you do not meet this requirement, you must audition for the director. Please contact the Orchestra Director to set up an audition.
  - **For Grades 10-12:** If you were not in the Gunn Orchestra during your freshman year you must audition for the director. Please contact the Orchestra Director to set up an audition.
- **Homework Expectation:** 2 hours per week minimum.
- **District SLOs Addressed in this Course:** 1, 2, 4, 6
CHORAL MUSIC

TREBLE CHOIR (7267)  (UC Approved “I”)  Year

The Treble Choir is open to students who enjoy singing and desire to participate in a quality-singing group. There will be strong emphasis on improving and increasing the vocal capabilities of the student. (A study of the basic music fundamentals—notes, rests, clefs, signatures, lines and spaces, rhythmic patterns, etc., will be included.)

Music will be drawn from our global heritage, including but not limited to the following musical cultures: African, Asian, Eastern and Western European, Indian, Middle Eastern, Latin American and North American. The chosen music will be sung in the language of each culture. As a result of having discussed, studied and performed the above, students will have a greater appreciation of cultural similarities and differences plus an increased awareness of the many contributions, which enhance our lives.

There will be several performance opportunities for all: fall, winter and spring concerts, Choir Tours, Music Revues, district/area festivals, Baccalaureate, solo/ensemble concerts and feeder school concerts. This course is open to grades 9-12.

- **Prerequisites:** An interest in singing is necessary. However, no previous experience is required.
- **Homework Expectation:** Students will spend approximately 10-12 hours per quarter outside class time in extra rehearsals and performances. This averages out to about 1 hour per week.
- **District SLOs Addressed in this Course:** 1, 2, 6

CONCERT CHOIR (7218)  (UC Approved “I”)  Year

The Concert Choir is open to students who enjoy singing and desire to participate in a quality singing group. There will be a strong emphasis on vocal training, production, phrasing, and diction with special work devoted to extending the vocal range of the singers. Basic music theory will be included to aid in the improvement of sight-reading. Both performance and written tests will be included in the curriculum. Memorization of performance music and consistent attendance are required.

Music will be drawn from our global heritage, including, but not limited to, the following musical cultures: African, Asian, Eastern and Western European, Indian, Middle Eastern, Latin American, and North American. The chosen music will be sung in the language of each culture. As a result of having discussed, studied, and performed the above, students will have a greater appreciation of cultural similarities and differences plus an increased awareness of the many contributions which enhance our lives.

There will be several performance opportunities for all: fall, winter and spring concerts, Choir Tours, Music Revues, district/area festivals, Baccalaureate, solo/ensemble, feeder school concerts. Also opportunities for individuals to audition for other ensembles and solos: Chamber Singers, Solos for concerts/shows, All-State Honor Choir and National Honor Choirs. This course is available for Career Technical Education credit to students in grades 11-12 with teacher approval.

- **Prerequisites:** Treble Choir or by audition
- **Homework Expectation:** Students will spend approximately 10-12 hours per quarter outside class time in extra rehearsals and performances. This averages out to about 1 hour per week.
- **District SLOs Addressed in this Course:** 1, 2, 6

ADVANCED VOCAL (CHAMBER SINGERS) (7226)  (UC Approved “I”)  Year

This group is open to students currently enrolled in Concert Choir who have had a minimum of a year of training and performance with a choral group and have auditioned for the group. The group meets evenings (with some special sectionals/rehearsals during lunch). It is a performance-oriented course, emphasizing vocal production, music reading skills and rehearsal and performance of repertoire appropriate for “chamber singing”; from madrigals to music of the Baroque, Classical, Romantic, Modern, and Contemporary periods along with works representative of other cultures of the world. This group will be expected to memorize music independently and to perform extensively.

- **Prerequisites:** By audition only (AUDITIONS ARE HELD DURING THE FIRST WEEK OF SCHOOL).
- **Homework Expectation:** Students will spend approximately 10-12 hours per quarter outside class time in extra rehearsals and performances. This averages out to about 1 hour per week.
- **District SLOs Addressed in this Course:** 1, 2, 6
AP MUSIC THEORY (7379)  
(UC Approved “f”)  
Year

This course can be taken for AP credit if enrolled for the full year and all additional AP course work has been completed.

Basic music theory, i.e., names of lines and spaces of the grand staff, clef signs, key and time signatures, note and rest values, and scales, both major and minor, will serve as an introduction to the course.

Ear training and dictation, sight-reading and sight-singing, form and analysis, and elementary orchestration will be part of the course. The harmony portion of the course will include the study of: chord structures, positions and inversions, harmonization of bass and soprano lines, use of the figured bass, and analysis of compositions for piano, chorus, and orchestra.

As a result of this study, students will be able to compose an original work and notate it correctly. This original composition will be performed in June and is required. This course is open to grades 11-12.

- **Prerequisites:** Open to all students interested in the course. If a student is uncertain if their musical background is sufficient, they can take a pretest to determine their level of experience with musical notation.
- **Homework Expectation:** 20-45 minutes 3 times a week depending on the student’s musical background before entering the course. Each unit also has a composition assignment that requires additional time. A student with poor listening skills may need additional time outside of class to develop the necessary aural recognition skills required.
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6

THEATRE

THEATER 1 (1070)  
(UC Approved “f”)  
Year

Theatre 1 provides an introduction to theatre as a discipline and art form. Through theatre games and improvisation exercises, students will develop confidence, trust, and voice and movement skills. As they give and receive criticism on performances in and outside of class, including scene and monologue work, students will apply evaluative criteria and appreciate excellence in performance. By studying theatre as an expression of both history and culture, students will explore the way in which theatre affects and is affected by its societal context. This course is open to grades 9-12.

- **Prerequisites:** None
- **Homework Expectation:** Minimal homework
- **District SLOs Addressed in this Course:** 1, 2, 6

THEATER 2 (1073)  
(UC Approved “f”)  
Year

Theatre 2 provides an introduction to theatre as a discipline and art form. Through theatre games and improvisation exercises, students will develop confidence, trust, and voice and movement skills. As they give and receive criticism on performances in and outside of class, including scene and monologue work, students will apply evaluative criteria and appreciate excellence in performance. By studying theatre as an expression of both history and culture, students will explore the way in which theatre affects and is affected by its societal context. This course is open to grades 10-12.

- **Prerequisites:** Theatre 1
- **Homework Expectation:** 15 minutes per night
- **District SLOs Addressed in this Course:** 1, 2, 4, 5, 6

THEATER 3 (1076)  
(UC Approved “f”)  
Year

Theatre 3 is designed to build upon the skills learned in Theatre 1 and 2. Through participation in in-depth projects, students will apply directing, acting, technical, and dramaturgical skills. During these projects, they will write and adapt scripts and research societal contexts. By exploring different theatrical genres, students will evaluate and appreciate a variety of production styles including non-Western and non-traditional theatre. This course is open to grades 11-12.

63  
GUNN COURSE CATALOG 2018-2019
• Prerequisites: Theatre 2 and permission of instructor
• Homework Expectation: 15 minutes per night
• District SLOs Addressed in this Course: 1, 2, 6

THEATER 4 (1097) (UC Approved “f”) Yea

Theatre 4 provides an opportunity for students to pursue an individualized course of study, taking leadership roles in in-depth theatrical projects in their areas of interest. Students will locate their productions within a theatrical genre, emphasizing the historical and cultural influences on their project. Students will create unified production concepts, integrating the contributions of the director, actor, designer, playwright, and spectator of a theatrical event.

SENIOR PROJECT: Students who are selected to produce and direct a one-act production in the spring may have the option to use this as the focus for a senior project. Prior approval from the instructor is required. This course is open to students in grade 12.

• Prerequisites: Theatre 3 and permission of instructor
• Homework Expectation: 15 minutes per night
• District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6
The Gunn World Language department offers five languages: French, German, Japanese, Mandarin Chinese and Spanish. At all levels of instruction students are immersed in the target language and culture. Emphasis is placed on oral and written communication using performance-based assessments. Classes are offered in sequential order in order to build the proper foundation for oral and written proficiency.

Students who successfully begin their language studies in middle school move directly into level 2. Students coming from out of the PAUSD district and/or who are native or heritage speakers or have been in after-school or immersion programs are required to take a placement exam (offered in February, May and August) to determine their appropriate placement. Please see the Gunn Web site or contact the World Language Instructional Supervisor for more details about this exam.

The ranges of proficiency levels referred to in the course descriptions come from the American Council of Teachers of Foreign Language (ACTFL) proficiency guidelines:

The Gunn World Language Department supports and encourages all language learning to the highest degree of proficiency possible. To this end, we strongly encourage students to take language all four years of high school in order to achieve maximum proficiency in reading, writing, speaking, and listening according to the ACTFL Proficiency Standards, with which all of our courses are aligned. When a student chooses to take an accredited course off-campus, credit for that course can be granted if the student can demonstrate level-equivalent proficiency according to the ACTFL scale at the completion of the course by taking a department – administered proficiency test. If a student wishes to advance to a higher level, he or she must take a department-administered proficiency placement test before the beginning of the school year in order to demonstrate the appropriate proficiency for the desired level.

**FRENCH 1** (4110)  
**GERMAN 1** (4210)  
**JAPANESE 1** (4270)  
**MANDARIN CHINESE 1** (4010)  
**SPANISH 1** (4410)

(UC Approved “e”)  
Year

Level I World Language classes are designed for non-native speakers of the target language. The curriculum prepares students to: perform interpersonal, interpretive and presentational communicative tasks within the novice range on the ACTFL Proficiency Guidelines; interpret, exchange, and present information, concepts and ideas both within the classroom and beyond on a variety of topics including connections to other subject areas; and understand the relationship among the products, practices and perspectives of the target culture(s) and other cultures. In addition, students develop insight into their own language and culture. Themes may include family, friends, home, school, food and customs, geography, seasons, weather, and travel.

- **Prerequisites:** None; grades 9-12
- **Homework Expectation:** Up to 1.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

---

**FRENCH 2** (4120)  
**GERMAN 2** (4220)  
**JAPANESE 2** (4275)  
**MANDARIN CHINESE 2** (4020)  
**SPANISH 2** (4420)

(UC Approved “e”)  
Year

Level II World Language classes are designed for non-native speakers of the target language. The curriculum prepares students to: perform interpersonal, interpretive and presentational communicative tasks within the novice high to intermediate low range on the ACTFL Proficiency scale; interpret, exchange, and present, information,
concepts and ideas both within the classroom and beyond on a variety of topics including connections to other subject areas; and understand the relationship among the products, practices and perspectives of the target culture(s) and other cultures. In addition, students develop insight into their own language and culture. Themes may include family and friends, school schedules, leisure activities, health, shopping, directions, buildings and monuments, places and events.

- **Prerequisites:** Level 1 or department approval; grades 9-12
- **Homework Expectation:** Up to 1.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

Level III World Language classes are designed for non-native speakers of the target language. The curriculum prepares students to: perform interpersonal, interpretive and presentational communicative tasks within the intermediate mid-range on the ACTFL Proficiency Guidelines; interpret, exchange, and present information, concepts and ideas both within the classroom and beyond on a variety of topics including connections to other subject areas; and understand the relationship among the products, practices and perspectives of the target culture(s) and other cultures. In addition, students develop insight into their own language and culture. Themes may include family and friends, preferred activities, healthy lifestyles, professions and work, developments in technology, history, art, literature, music, and global challenges.

- **Prerequisites:** Level 2 or department approval; grades 9-12
- **Homework Expectation:** up to 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
MANDARIN CHINESE CIVILIZATION & CULTURE H (4041)  
(UC Approval Pending)  
Year
This course provides students with the opportunity to continue to demonstrate proficiency in Mandarin Chinese at the Intermediate High to Advanced-low range in each of the 3 modes of communication on the ACTFL Proficiency Guidelines. Students analyze the historical, political, and social issues of the Mandarin-speaking world using authentic literary texts, films, music, art, and mass media. Students also have the opportunity to explore the wide range of cultures in the world where Mandarin is spoken (China, Taiwan, Singapore, etc.). Language skills are developed through oral presentations, research projects, and reflections on literary and non-literary texts. Students are encouraged to independently and deeply explore and research topics of interest to them.

- **Prerequisites:** Chinese 3 or department approval; grades 9-12
- **Homework Expectation:** Up to 1.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

SPANISH CIVILIZATION & CULTURE H (4441)  
(UC Approved “e”)  
Year
This honors course provides students with the opportunity to continue to demonstrate their proficiency in Spanish at the Intermediate High to Advanced-Low range in each of the 3 modes of communication on the ACTFL Proficiency Guidelines. Students analyze the historical, political, and social issues of the Spanish-speaking world using authentic literary texts, films, music, art, and mass media. Students also have the opportunity to explore the wide range of cultures in the world where Spanish is spoken (Spain, Africa, Caribbean Islands, Central and South America, etc.) Language skills are developed through oral presentations, research projects, and reflections on literary and non-literary texts. Students are encouraged to explore and research, in more depth, topics of interest to them.

- **Prerequisites:** Spanish 3 or department approval; grades 9-12
- **Homework Expectation:** up to 1.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

JAPANESE 4 H (4289)  
(UC Approved “e”)  
Year
Level 4H Japanese curriculum prepares students to: perform interpersonal, interpretive and presentational communicative tasks within the novice high to intermediate mid-range on the ACTFL Proficiency Guidelines; interpret, exchange, and present, information, concepts and ideas both within the classroom and beyond on a variety of topics including connections to other subject areas; and understand the relationship among the products, practices and perspectives of the target culture(s) and other cultures. In addition, students develop insight into their own language and culture. Themes may include job applications, holiday traditions, planning a trip, educational systems, and speech styles.

- **Prerequisites:** Japanese 3 or department approval; grades 9-12
- **Homework Expectation:** Up to 2 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

AP FRENCH LANGUAGE & CULTURE (4149)
AP GERMAN LANGUAGE & CULTURE (4249)
AP JAPANESE LANGUAGE & CULTURE (4290)
AP MANDARIN CHINESE LANGUAGE & CULTURE (4029)
AP SPANISH LANGUAGE & CULTURE (4449)

The AP Language and Culture courses provide students with opportunities to demonstrate their proficiency at the intermediate to pre-advanced range in each of the 3 modes of communication on the ACTFL Proficiency Guidelines. Students are expected to: engage in spoken and written interpersonal communication; synthesize information from a variety of authentic audio or audiovisual resources; synthesize information from a variety of authentic written and print resources; plan, produce and present spoken and written presentations. The 6 broad themes of study include beauty and aesthetics, contemporary life, families and communities, global challenges, personal and public identities, and science and technology.

- **Prerequisites:** Level 3 or department approval; grades 10-12
- **Homework Expectation:** up to 2.5 hours per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7
FRENCH CIVILIZATION & CULTURE H (4154B)* (UC Approved “e”) Year

Blended Learning Course

This course provides students with the opportunity to continue to demonstrate their proficiency in French at the Intermediate High to Pre-Advanced range in each of the 3 modes of communication on the ACTFL Proficiency Guidelines. Students analyze the historical, political, and social issues of the French-speaking world using authentic literary texts, films, music, art, and mass media. Students also have the opportunity to explore the wide range of cultures in the world where French is spoken (Europe, Africa, Caribbean islands, Southeast Asia, etc.) Language skills are developed through oral presentations, research projects, and reflections on literary and non-literary texts. Students are encouraged to explore and research in more depth topics of interest to them.

*Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- Prerequisites: French AP Language or department approval; grades 11-12
- Homework Expectation: Up to 2.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6, 7

AP SPANISH LITERATURE & CULTURE (4459) (UC Approved “e”) Year

The AP Spanish Literature and Culture course uses a thematic approach to introduce students to representative texts (short stories, novels, poetry, and essays) from Peninsular Spanish, Latin American, and United States Hispanic literature. Students develop proficiencies across the full range of communication modes (interpersonal, presentational, and interpretive), thereby honing their critical reading and analytical writing skills. Literature is examined within the context of its time and place, as students reflect on the many voices and cultures present in the required readings. The course also includes a strong focus on cultural connections and comparisons, including exploration of various media (e.g. art, film, literary criticism).

- Prerequisites: Spanish AP or department approval; grades 10-12
- Homework Expectation: Up to 2.5 hours per week
- District SLOs Addressed in this Course: 1, 2, 3, 4, 5, 6, 7
### LIVING SKILLS (8458)

This course provides students with the skills and knowledge that will help them to make informed and responsible decisions about issues that affect personal health and well-being. Subjects of study include identity, influences, individuality, communication, health, drug and sex education.

This fulfills the high school graduation requirement. 15 hours of community service required.

- **Prerequisites:** None; grades 9-12
- **Homework Expectation:** 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6, 7

### BEGINNING JOURNALISM (1457)

Through reading and analyzing professional models of non-fiction writing including news, features, editorials and reviews, students will learn to plan, write and revise news stories, profiles, personal experience, observational and persuasive writing. Students will acquire the skills of fact gathering and note-taking through interviews with primary sources and research of secondary sources. This elective course is a prerequisite for Advanced Journalism.

- **Prerequisites:** None; grades 9-12
- **Homework Expectation:** Minimal – most work happens in class
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6, 7

### SCHOOL SERVICE (8385)

**Semester 1**

Offers the student an opportunity to give valuable service to the school and gain valuable experience in the process. While students who have some clerical skills are needed, those students who may be thinking of teaching as a career should be most interested. In this program they will be given the opportunity to work with teachers in the classroom and school offices in their particular fields of interest, thus gaining a better understanding of teaching as a career. They will also work with experienced office personnel, helping in the preparation and handling of educational materials. This course may be taken for a semester or a year and is open to students of all grade levels.

- **Prerequisites:** None; open to all grades
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 4, 5, 7

### SCHOOL SERVICE (8386)

**Semester 2**

- **Prerequisites:** None; open to all grades
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 4, 5, 7

### AAR – AP SEMINAR (8401)

**Year**

AP Seminar, an interdisciplinary offering from the College Board, is the first of two courses in the AP Capstone program. The course offers the foundational research and writing skills students will need for college level and professional work. The course focuses on the process-oriented skill sets rather than on content specific to a particular discipline. Students will synthesize and articulate research on any number of subjects into formally presented arguments, both written, multi-media, and oral. There is also a large collaborative component of the course, as students work in teams to present their findings. Similar to a “First Year” seminar experience in college, students will engage in cross-curricular conversations that explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives (scientific, economic, political, cultural). Students should be strong readers of non-fiction primary texts, fluent writers and team players.

- **Prerequisite:** None; grades 10-12
- **Homework Expectation:** 3 to 4 hours per week
- **Please see page 22 in the CTE section of the course catalog for information about AAR (8429)**
- **District SLOs Addressed in this Course:** 1, 2, 3, 4, 5, 6
- **For more information, please visit:** http://aar.pausd.org
FOCUS ON SUCCESS (2010)  
(NOT UC Approved)  

Focus on Success is an award winning study and life skills elective, designed to support students in their core academic classes through lessons in organization, time management, study skills, goal setting, and healthy lifestyles and by providing homework time and support from tutors.

For more information, talk to your counselor or visit our Web page: https://sites.google.com/a/pausd.org/gunn-fos/

- **Prerequisites:** Interview; open to all grades
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 2, 4, 5

AVID (8334)  
(UC “g” Approved)  

The AVID course is a UC-approved elective class for students who are college-bound. The AVID curriculum focuses on writing, inquiry, collaboration, organization, and reading (WICOR) through the AVID High School curriculum in both teacher and tutor-led activities. While concurrently enrolled in a college-prep course of study, students learn strategies to enhance success. Note-taking, outlining, writing, speaking, reading, test-taking strategies, and self-awareness are stressed.

In addition, the course includes college motivational activities and intensive preparation for ACT, SAT I and SAT II. Teachers may recommend students for the program or interested students can get an application by visiting the Gunn Web site. Interested students will be interviewed to see if they are a good fit for the program.

- **Prerequisites:** Interview; open to all grades open to 9th and 10th grades
- **Homework Expectation:** 1 hour per week
- **District SLOs Addressed in this Course:** 1, 2, 4, 5, 7

SMALL LEARNING COMMUNITY  

BIOLOGY 1A SLC (3215)  
WORLD HISTORY SLC (9343)  
CONTEMPORARY HERITAGE SLC (9409)  
LITERARY STYLE SLC (9410)  

(Classes are UC Approved)  

Our Small Learning Community is designed for freshmen and will provide a tightly knit community, integrated curriculum, outdoor adventure, and opportunities to grow as leaders.

All students will share some common classes and teachers. The content and standards will be the same as our traditional courses; however, in the Small Learning Community program, the teachers and students will work together to explore common themes and demonstrate their knowledge in some cross-curricular projects.

Students in the Small Learning Community will be enrolled together in the same English, Biology 1A, and history courses which, in addition to the traditional content, will focus on leadership, character, and team building games.

In addition, we will offer our students outdoor adventure trips and leadership training as they do a day field trip to YMCA Ropes Course, Jasper Ridge, Angel Island, and a five-day trip to Yosemite and take part in the Yosemite Institute.

Our theme is “A Sense of Place,” and in our integrated curriculum, students will explore their place in history and in the local and global community. Our Small Learning Community will provide ninth graders with a sense of place at Gunn, as they transition from the middle to the high school.

For more information about this program, please visit the program’s Web site https://sites.google.com/a/pausd.org/slc/ and/or contact a school counselor.

- **Prerequisites:** None; open to 9th grade
- **Homework Expectation:** See individual courses in English, Math, Social Studies and Science
- **District SLOs Addressed in this Course:** See individual courses in English, Math Social Studies and Science.
- **Courses Need to be Selected as Follows:** Biology 1A SLC (3215); World History SLC (9343); Contemporary Heritage SLC (9409) and Literary Style SLC (9410)
BLENDED LEARNING COURSES

PAUSD is offering a variety of Blended Learning Courses at both high schools (see chart below for full list). These courses feature a mix of instructional strategies that are delivered both online and face-to-face, with the goal of allowing the student more flexibility in meeting the course requirements while developing twenty-first century technology skills in a safe learning environment.

In these courses, students may receive one release day a week where they are not required to meet during the normal class time. With this release, students are able to complete their course assignments at their own time, place, and/or pace. Because of this, students interested in registering for blended courses should be self-motivated learners with good time management skills.

These release dates will be communicated in advance by the teacher and may not be provided for all students in the course. Students receiving a C- or lower will be required to attend class as normal during release times (other requirements may also apply). Students wanting more personalized support from their teachers are also invited to attend class as normal during release times. Homework expectations do not include independent work time given during the blended release periods.

To learn even more about Blended Learning courses, please see the district’s Web site:
https://www.pausd.org/high-school-education-9-12/blended-learning
The English Language Learners (ELL) program offers individual and group instruction to meet the needs of international students with limited English proficiency. We prepare students for College Prep classes by providing an extensive program of English instruction on different levels (emerging, expanding, and bridging English language proficiency). For the students with emerging English proficiency we offer individual tutoring in a student’s primary language to ensure access to the core curriculum.

In addition, we offer ELL Social Studies courses which are taught by teachers in the Social Studies Department and are open to international students. The University of California grants admission credit for all of the ELL social studies courses and for one year of bridging ELL (English EL28).

Because our international students contribute a welcome diversity to our campus, we encourage them to participate in school activities and clubs, so they can experience the social life of an American high school. This not only promotes cross-cultural understanding, but also helps young people maintain a positive self-concept.

If international students are at the emerging or expanding levels in English proficiency (that is, if they do not speak, read, and write in fluent English), and if they plan to earn a diploma of graduation, we urge them to enroll in the ELL program at Gunn High School.

### EL 1 – (2 periods) (8761)  
(NOT UC Approved)  
Year

This course satisfies the state and district requirements for graduation. It offers individual and group instruction to prepare students for the expanding fluency level. The course content includes beginning grammar, reading skills and basic vocabulary. Emphasis is placed on speaking, reading, listening, and writing in both formal and informal English. Methods and materials suitable for beginning language learners are used.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 2-2 ½ hours weekly
- **District SLOs Addressed in this Course:** 2, 5, 6
- **This course is two periods**

### EL 2 – (2 periods) (8762)  
(NOT UC Approved)  
Year

This course satisfies the state and district requirements for graduation. It offers individual and group instruction to prepare students for the bridging fluency level. It intensifies and expands the course content of English EL 1 by focusing on the fundamentals of grammar, spelling and punctuation, listening and reading comprehension, vocabulary development, and writing sentences using American idioms. Descriptive and academic paragraph writing is emphasized in the second semester. Methods and materials suitable for students with expanding English language proficiency are used. The course includes an individual reading program with weekly discussions in small groups.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 2-2 ½ hours weekly
- **District SLOs Addressed in this Course:** 2, 5, 6
- **This course is two periods**

### EL 28 (8768B)*  
Blended Learning Course  
(UC Approved “b”)  
Year

This course satisfies the state and district requirements for graduation. The course focuses on developing spoken, written, and interpretive communication based on a variety of texts organized by themes, and essential questions. The course includes an individual reading program with weekly meetings in small discussion groups. Grammar concepts, development of academic vocabulary, and essay writing techniques are also covered. In addition, the course participants work individually on a structured vocabulary mastery program overseen by the instructor.
Blended Learning Courses feature instruction delivered in a non-traditional schedule; possibly meeting one less time per week. This will require independent learning by students using Web-based tools, along with check-in times with teachers. For additional information about Blended Learning Courses, see page 71.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 3 hours weekly
- **District SLOs Addressed in this Course:** 2, 5, 6

### INTERMEDIATE COMPOSITION (1328)  
**Year**

This is a required one-year transition class for English Learners wanting to move from EL English classes to mainstream English classes. It satisfies state and district graduation requirements and also meets the requirements for admission to the University of California. The course integrates reading, writing, listening, and speaking skills around short readings in fiction and non-fiction. Students learn key vocabulary and write responses to reading that connect the reading to the theme and essential question of each unit. Advanced grammar and mainstream essay writing techniques are also covered.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 4 hours weekly
- **District SLOs Addressed in this Course:** 2, 5, 6
- **This course qualifies for English credit**

### CONTEMPORARY WORLD HISTORY ELL (8778)  
**Semester**

This course satisfies the state and district requirements for graduation. It continues the World History sequence with a study of the history and cultures of Asia, the Middle East, Africa, Latin America, and Eastern Europe, with emphasis on the inter-relationships among these nations and cultures.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 3 hours weekly
- **District SLOs Addressed in this Course:** 1, 2, 3, 5, 6

### US GOVERNMENT ELL (8781)  
**Semester**

This course satisfies the state and district requirement for graduation. It includes information on the U.S. Constitution and on the structure and operation of the American government at the local, state, and national levels. It also provides insights into American politics and political values. Discussion skills are emphasized, as well as reading newspapers and expressing opinions on legislative matters. Active participation in local community service is encouraged.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 3 hours weekly
- **District SLOs Addressed in this Course:** 1, 2, 3, 5

### WORLD HISTORY ELL (8784)  
**Year**

This course satisfies the state and district requirements for graduation. It includes the major historical eras of world history, from the Age of Enlightenment to an introduction to the Cold War. Emphasis is placed on the interrelationships among nations and cultures, as well as the major themes in history.

- **Prerequisites:** None; open to all grade levels
- **Homework Expectation:** 2 hours weekly
- **District SLOs Addressed in this Course:** 1, 2, 3, 5
- **This course qualifies for World History credit**
Special Education classes are offered to students who have an Individualized Education Program (IEP) and who qualify for these classes based on their area of disability, skill level, and demonstrated need. Students with IEP’s are enrolled in special education courses to support their individual needs in accessing the general education curriculum. Special education classes are intended to provide focused, direct instruction for students, to continue addressing their area(s) of need, in order to build necessary skills to access their coursework, gain independence and prepare for life after high school as aligned with their Individual Transition Plans. All modified content courses receive non-college prep (NCP) credit, as noted in each course description.

**SKILLS-BASED & SUPPORT CLASSES**

**ACADEMIC ENHANCEMENT (7039) (NOT UC Approved) Semester**

Academic Enhancement is a course designed to provide reading intervention that aligns with California State Standards designed to accelerate the reading levels and test scores of struggling readers by directly addressing individual student needs. The course provides differentiated instruction, high-interest fiction and nonfiction reading materials, and direct instruction in reading skills, vocabulary, writing, and grammar.

- **Prerequisites:** None
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 3, 4, 6

Placement in Academic Enhancement is recommended based on reading scores/level. This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit. This course must be taken concurrently with a general education English course.

**ACADEMIC PLANNING (8308) (NOT UC Approved) Semester**

This course is designed to provide students with instruction on organizational skills and academic study skills. Students are introduced to the concepts and methods needed to increase study efficiency and improve critical thinking. The course acquaints students with better study habits and the processes and practices of critical thinking. Specific areas that may be covered are listening, textbook reading, time scheduling, prioritizing, note-taking, test-preparation and test-taking strategies, project and paper development, library skills, basic study systems improvement, memory processes and strategies, and models of critical thinking. The course is designed to improve students’ knowledge and application of effective study and cognitive/thinking strategies so they can succeed in college and in any other environment.

- **Prerequisites:** None
- **Homework Expectation:** None
- **District SLOs Addressed in this Course:** 1, 3, 4, 6

Placement in Academic Planning is recommended based on student need for specialized support. This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit.

**ACADEMIC WRITING (7087) (NOT UC Approved) Semester**

This course gives students the opportunity to develop their academic writing skills. Students receive instruction in generating and developing effectively written sentences, paragraphs, and essays. They review basic grammar principles to develop sentence correctness and practice skills in expanding and clarifying sentence and paragraph content. A strong emphasis on planning, writing, and revising of assignments will be a key component of instruction. A combination of individualized and group instruction in a classroom or workshop setting will be used.
Students receive additional help writing for required English courses and more time to develop the skills they need to perform well in high school and prepare for college.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6

Placement in Academic Writing is recommended based on student need for specialized support in the academic area of writing. This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit. This course must be taken concurrently with a general education English course.

### ACADEMIC MATH (7088)

<table>
<thead>
<tr>
<th>NOT UC Approved</th>
<th>Semester</th>
</tr>
</thead>
</table>

This course will help students prepare for introductory algebra by strengthening their understanding of essential algebra prerequisites. The course will cover: arithmetic operations using fractions, decimals and integers; proportional reasoning using ratios and percents; solutions of linear equations; equivalent expressions; the distributive property; and graphs of linear functions. Students will investigate problems using tables, graphs, and equations in order to make connections between the three representations.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6

Placement in Academic Math is recommended based on student need for specialized support in the academic area of math. This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit. This course should be taken concurrently with a general education math course.

### SPECIALIZED PROGRAMS

### ACADEMIC COMMUNICATION (7070)

<table>
<thead>
<tr>
<th>NOT UC Approved</th>
<th>Year</th>
</tr>
</thead>
</table>

Academic Communication is a course that addresses social learning needs. The main goals of the courses in Academic Communication include: development of personal problem-solving, communication skills, perspective taking, a solid understanding of social thinking, flexibility and independence.

Academic Communication 1: This course addresses the social learning needs of students with deficits in the area of social cognition. Students receive direct instruction in the area of effective social communication strategies such as perspective taking, problem-solving, and communication skills. Students explore how emotions affect them in everyday situations. The Mental Health Therapist and Speech and Language Therapist deliver lessons weekly in this class and provide additional support to students as needed.

Academic Communication 2/3: This course provides direct instruction on career and college related skills as well as financial skills including budgeting. The course focuses on addressing social cognitive deficits that are directly related to getting and maintaining employment and daily living skills. Vocational opportunities are provided for exploration. The Mental Health Therapist and Speech and Language Therapist deliver lessons weekly in this class and provide additional support to students as needed.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6

This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit. This course should be taken concurrently with a general education math course.
THERAPEUTIC ELECTIVE CLASS (7078) (NOT UC Approved) Year

The Therapeutic Elective Class (TEC) serves students who require regular therapeutic interventions in order to access their educational programs. The class includes academic instruction and therapeutic support. This class is co-taught by a special education teacher and a mental health therapist. Group therapy services are embedded into the class with individual therapy services available for students who qualify. This class is designed to teach students how to effectively and safely regulate their emotions with a goal of being able to successfully transition out of the class after one year.

Referral process, assessments, and IEP documentation required: In order for a student to be eligible for the TEC class, the case manager must submit a TEC referral form. The therapist may conduct an assessment and an IEP meeting will be held to discuss assessment results and recommendations.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6

This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service. Upon successful completion, students receive 10 units of elective credit. This course should be taken concurrently with a general education math course.

CAREERS CLASS (7082) (NOT UC Approved) Semester

This course is designed to assist students with identifying their strengths, weaknesses, and interest while learning about a wide variety of careers. Students will complete several different career interest inventories and self-assessments in order to identify where their individual strengths and interest intersect. Students will explore different career options and conduct research on those that interest them most. Through this research, students will investigate what educational prerequisites and/or vocational experience is required to enter their field of choice. Students will also work toward job placement/internship experiences.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6

This course is open to 10th, 11th, and 12th grade students. Students receive elective credit for this course with a letter grade. This course is a Specialized Academic Instruction course and requires a signed IEP delineating it as a direct service.

ADAPTIVE PHYSICAL EDUCATION (2750) (NOT UC Approved) Semester

An adaptive physical education class available for students for whom an assessment has been made by a multi-disciplinary Individual Education Planning (IEP) team. This assessment takes into consideration all other physical education options, health history, current medical status, and APE assessment for the students.

- Prerequisites: None
- Homework Expectation: None
- District SLOs Addressed in this Course: 1, 3, 4, 6
TIME MANAGEMENT

The number of hours you spend on certain tasks can be surprising, especially when you begin to compare the totals. Do you spend almost as much time doing extracurricular activities as you do academics? Do you sleep—at all? Are most of your meals eaten on the run? Do you wish you had more free time? As you begin to evaluate your current time expenditures, consider some of the points below.

**Academics**

When planning your academic time ask yourself...

- How are you doing academically? Are you happy with your progress or do you feel you need to put more time into your work? Do you need more time for studying, assignments or both?
- Which subjects are more challenging for you and require more of your time? Would it be helpful to seek help in the AC and/or Library?
- Are you able to complete assignments on time? Do you have to stay up very late the night before an assignment is due to finish?
- How often do you find yourself procrastinating on assignments? Do you need to work on using the academic time you have more effectively?
- Do you currently use weekend time to study and do assignments?
- Do you sometimes feel overwhelmed by the amount of work you have to do?
- Do you usually study more than 2 days in advance of an exam? Are you able to prepare adequately for tests?

**Extracurricular Activities**

Finding the right balance between academics and extracurricular activities can be difficult. A commitment made to an activity at the start of the year might not be easy to continue if classes become consuming.

When planning your extracurricular time ask yourself...

- Which of your extracurricular activities is most important to you? Why?
- Which of these activities help you to relax? Which help you to relieve or work off stress?
- Does your enthusiasm sometimes lead you to overcommitting to activities, clubs, sports, etc.?
- Have your extracurricular commitments ever adversely affected your academics? Are they adversely affecting your academics now?
- Which do you enjoy more: well-structured activities with meeting times and established goals or independent activities that you pursue at your own pace?
- Which of your extracurricular activities could you pursue in other ways? Are there more flexible ways to participate in the same activity?

**Sleep**

Students love to sleep; yet it is the first thing they give up when pressed for time. Not only is sleep necessary for your physical and mental well-being, you will simply not be able to concentrate well if you are tired, distracted and mentally run down. You will spend more time on assignments, learn appreciably less and be vulnerable to making obvious mistakes on exams and projects. Although it might feel as though you are doing more by sleeping less, the habit isn’t sustainable, so sleep well and often, and consider it an investment.
When planning for sleep time ask yourself...

- How many hours of sleep per night are ideal for you? How many hours of sleep do you need to wake up feeling rested and refreshed, but not groggy?
- Between which hours of the day are you most comfortable sleeping?
- Do you feel that you get enough sleep now?
- When you run short of time on assignments, do you sacrifice sleep to make up the balance?
- Do you often feel tired or lethargic in class, especially in the morning?
- Do you sometimes have difficulty concentrating in class and/or have headaches due to fatigue?
- Do you occasionally fall asleep in class?
- Do you often wish for (or take) a nap during the day?
- Are you able to get out of bed when the alarm clock rings the first time?

Meals
Eating is just as important as sleeping for all the same reasons. Always eat something in the morning, even if it is just a breakfast bar on the way to class. Plan to make sit-down time for lunch and dinner—not only because you need the fuel, but because you need physical, mental and emotional breaks in your day. Meals can rejuvenate you on all of these levels. Relax, eat well and enjoy yourself.

When planning for meal time ask yourself...

- Do you make a point of eating regularly and well? Although you can’t always have a healthy, well-balanced meal, do you usually try to make health-conscious decisions?
- Do you occasionally skip meals? How do you feel when you do?
- Does being hungry sometimes distract you in class?

Free Time!
At last! Are you surprised at the amount of free time that you have? Is it too much or too little? Do you prefer your days to be more flexible and spontaneous or packed and busy? The amount of free time that you have at the start of the year might diminish as you find fun things to do and your academics gain momentum. Again a conservative approach is often best: Leave yourself some space to unwind and relax every day, and extra time to handle the unexpected—whether it is a difficult assignment or going out with friends.

When planning for free time ask yourself...

- Which of your free time activities are most important to you? Which could you give up if you wanted or needed to spend time on other things?
- Which of these activities help you to relax? Which help you to relieve or work off stress?
- Do you occasionally find yourself procrastinating by overindulging in one of these activities? Do you need to be more disciplined about limiting these activities?
- Is there something that you would really like to do or try, but you never seem to have the time? Could you fit it in by reprioritizing your other tasks?
